urgent quest for a strong architecture that is both modern and compatible with its setting SOM addressed important urban problems with seminal studies for San Antonio Chicago and Washington as well as with designs for large urban transportation facilities on the East Coast At the same time the firm sought work abroad in the face of a barren domestic economy designing universities new towns airport terminals and commercial buildings on several continents Whereas regret surrounds plans for Iranian cities halted by political revolt planning projects of this kind introduced the firm s teams to social urgency and primary research into indigenous form The energy crisis brought still other challenges Its special requirements created new architectural opportunities that have been demonstrated by buildings in a variety of locations SOM early recognized the potential of computer analysis and pioneered its adoption in dealing with structural and architectural problems This capability dramatically extended SOM s capacity for the creative study of energy efficiency and performance calculations

SOM ,2009-11-17 Skidmore Owings the middle of the century to collaborations with legendary patrons such as Lever Brothers John Hancock Sears Roebuck and Yale University and the later years to charting a course for architecture at a time when modernism was beginning to embrace contextualism and local cultures In the years 1984 1996 SOM continued to develop the skills for which it had become known high standards of design imaginative structural solutions exceptional detailing city making on a grand scale expertise in managing large and complex sites and also addressed new areas of design and practice A contextual modernism one attentive to climate topography and the regional vernacular a focus on restoration and reuse and an expansion of international work came to the fore in a time of great social and economic change In his introduction Detlef Mertins traces the firm s history in parallel with this restructuring a growth in real estate development and financial markets that fundamentally changed how buildings were commissioned and built Rows Wharf in Boston the USG and AT T Buildings in

Chicago and Worldwide Plaza and the Islamic Cultural Center in New York are among the buildings that represent the firm's contextualism and inventive interpretation of historic precedents. At the same time Exchange House in London demonstrates SOM's continued commitment to modernism and technological expression. Many projects such as Enerplex in Plainsboro, New Jersey and the Pacific Bell Administrative Complex in San Ramon, California broke new ground in strategies for long-term energy conservation. Among the firm's important restorations of this era are the Civic Opera House in Chicago and the U.S. Court of Appeals in San Francisco as well as a series of historic train stations along the Northeast Corridor. International works include the National Commercial Bank in Saudi Arabia, Ayala Tower One, Philippine Stock Exchange, the Hong Kong Convention and Exhibition Center and especially Canary Wharf in London, an entire district based on a new model of urban planning. These demonstrate SOM's coordinated expertise in planning transportation and civil engineering and landscape design in an era of globalization. Finally, the most recent works, especially the landmark Jin Mao Tower in China, point the way to SOM's work of the twenty-first century: diverse, contextual, urbane and populist.
