Jungian and Interdisciplinary Analyses of Emotions Elizabeth Brodersen, Isabelle Meier, Valeria Céspedes

Musso, 2025-04-09 This comprehensive collection of chapters concentrates on the multifaceted theme of emotions and deepens our understanding of the role emotions play within the psyche. Leading international psychoanalysts and academics offer broad interdisciplinary dimensions using their own unique perspectives on the topic of emotions. Delineating into five parts, this volume focuses on key themes such as emotions, imagination, and method; the emotional basis of archetypes and complexes; relational trauma; mapping contagion across cultures; the contribution from neuroscience; and finally, dreams and the transcendent. Clinical cases presented underline the important role unconscious disassociated emotions play in the formation of symptomatology and how wholeness is facilitated through their acceptance. This collection offers a timely contribution to the interdisciplinary study of emotions, placing Jungian psychology firmly within that framework. It will be of great interest to Jungian analysts, trainees, and psychotherapists, as well as interdisciplinary academic researchers interested in methodology, unconscious processes, transference, and dreams.
