Vandijk, 1972     *Universal Grammar and Narrative Form* David Herman, 1995 In a major rethinking of the functions methods and aims of narrative poetics David Herman exposes important links between modernist and postmodernist literary experimentation and contemporary language theory Ultimately a search for new tools for narrative theory his work clarifies complex connections between science and art theory and culture and philosophical analysis and narrative discourse Following an extensive historical overview of theories about universal grammar Herman examines Joyce s Ulysses Kafka s The Trial and Woolf s Between the Acts as case studies of modernist literary narratives that encode grammatical principles which were re fashioned in logic linguistics and philosophy during the same period Herman then uses the interpretation of universal grammar developed via these modernist texts to explore later twentieth century cultural phenomena The problem of citation in the discourses of postmodernism for example is discussed with reference to syntactic theory An analysis of Peter Greenaway s The Cook The Thief His Wife and Her Lover raises the question of cinematic meaning and draws on semantic theory In each case Herman shows how postmodern narratives encode ideas at work in current theories about the nature and function of language Outlining new directions for the study of language in literature Universal Grammar and Narrative Form provides a wealth of information about key literary linguistic and philosophical trends in the twentieth century     *The SAGE Handbook of Innovation in Social Research Methods* Malcolm Williams, W Paul Vogt, 2011-04-19 Social research is a burgeoning field Of course it has many traditions and approaches but there is a high premium upon thinking differently and thinking anew because social life is never static or wholly predictable The Handbook edited by internationally recognized scholars provides a comprehensive pitch perfect critical assessment of the field The main features of the Handbook are Clear organization into 4 parts dealing with The Social Context of Research Design and Data Collection Integrating The Analysis of New Data Types Sampling Inference and Measurement Clear cutting edge chapters on Objectivity Causation Organizing Social Research Correspondence Analysis Grounded Theory Conversational Surveys Mixed Methods Meta Analysis Optimal Matching Analysis GIS Analysis Quantitative Narrative Analysis Longitudinal Studies SEM MLM Qualitative Comparative Analysis Respondent Driven Sampling Brings together a glittering assembly of the key figures working in the field of research methods Demonstrates the continuities and productive tensions between classical traditions and real world research The result is a superbly organized text which will be required reading for anyone interested in the routes and future of social research It is an unparalleled teaching resource and a must have for serious social researchers     Prolegomena to Inferential Discourse Processing Roger van de Velde, Roger G. van de Velde, 1984-01-01 This work consists of an examination and revision of some of the main theses

of Speech Act Theory in relation to the problem of ideology and action guiding language Starting from the idea that linguistic philosophy must take into account how the social structure of the linguistic community may influence and direct the way its language is used a critical method of analysis is proposed developing Speech Act Theory in a way suitable for this purpose The main guideline of this proposal is the consideration that a theory of action rather than a theory of meaning should be taken as central in the analysis of language The notion of illocutionary force the problem of intentions and conventions in the constitution of speech acts the definition of context and the classification of speech acts are then discussed Based on the conclusions of this discussion a pragmatic method for the analysis of language is formulated **A Semiotic Theory of Texts**

**Comprehensive Reference Dictionary of Linguistics, A-D** Huseynaga Rzayev,2019-09-10 This exhaustive linguistic dictionary has been designed both for classroom use and for English language professionals It provides a unique and effective learning source which mirrors the continual spring of linguistic knowledge It suggests a comprehensive insightful analysis of the highly controversial and complicated issues of present day linguistics This dictionary provides a pedagogical tool for those teaching various aspects of language to both upper lever undergraduates and graduate level researchers and exploits the benefits of Turkish Azerbaijani and Russian language scholarship in this field **Thematics** Max M.

Louwerse,Willie van Peer,2002-05-29 Themes play a central role in our everyday communication we have to know what a text is about in order to understand it Intended meaning cannot be understood without some knowledge of the underlying theme This book helps to define the concept of themes in texts and how they are structured in language use Much of the literature on Thematics is scattered over different disciplines literature psychology linguistics cognitive science which this detailed collection pulls together in one coherent overview The result is a new landmark for the study and understanding of themes in their everyday manifestation **Biblical Semantic Logic** Arthur Gibson,2002-04-19 Biblical Semantic Logic first appeared in

1981 and seeks to show that the study of biblical and ancient Near Eastern languages and literatures can be established on a logical basis In a new prologue for this edition Gibson reviews some of the scholarly treatment of the topic since the appearance of the first edition He addresses the topics of originality and infinity and also suggests that deep areas of literary creativity resemble cosmology and pure mathematics Gibson then demonstrates how the central areas of biblical usage names predicates expressions of quantity idioms can be mapped employing some contemporary philosophy logic and linguistics There is criticism of some previous scholarly interpretations especially where these have led to the underestimation of the conceptual and logical sensitivity of biblical narrative **Factors in a Theory of Poetic**

**Translating** Robert de Beaugrande,1978-01-01 **Rethinking Race and Ethnicity in Research Methods** John H Stanfield II,2016-06-03 This collection of original work demonstrates the new ways in which particular research

methodologies are used valued and critiqued in the field of race and ethnic studies Contributing authors discuss the ways in which their personal and professional histories and experiences lead them to select and use particular methodologies over the course of their careers They then provide the intellectual histories strengths and weaknesses of these methods as applied to issues of race and ethnicity and discuss the ethical practical and epistemological issues that have influenced and challenged their methodological principles and applications Through these rigorous self examinations this text presents a dynamic example of how scholars engage both research methodologies and issues of social justice and ethics This volume is a successor to Stanfield s landmark *Race and Ethnicity in Research Methods* Reference in Discourse A. A. Kibrik, 2011-09 This is the first full study of how people refer to entities in natural discourse It contributes to the understanding of both linguistic diversity and the cognitive underpinnings of language and it provides a framework for further research in both fields Andrej Kibrik focuses on the way specific entities are mentioned in natural discourse during which about every third word usually depends on referential choice He considers reference as an overt representation of underlying cognitive processes and combines a theoretically oriented cognitive approach with empirically based cross linguistic analysis He begins by introducing the cognitive approach to discourse analysis and by examining the relationship between discourse studies and linguistic typology He discusses reference as a linguistic phenomenon in connection with the traditional notions of deixis anaphora givenness and topicality and describes the way his theoretical approach is centered on notions of referent activation in working memory He argues that the speaker is responsible for the shape of discourse and that referential expressions should be understood as choices made by speakers rather than as puzzles to be solved by addressees Kibrik examines the cross linguistic aspects of reference and the typology of referential devices including referring expressions per se such as free and bound pronouns and referential aids that help to tell apart the concurrently activated entities This discussion is based on the data from about 200 languages from around the world He then proposes a comprehensive model of referential choice in which he draws on concepts from cognitive linguistics psycholinguistics cognitive psychology and cognitive neuroscience and applies this to Russian and English He also draws together his empirical analyses in order to examine what light his analysis of discourse can shed on the way information is processed in working memory In the final part of the book Andrej Kibrik offers a wider perspective including deixis referential aspects of gesticulation and signed languages This pioneering work will interest linguists and cognitive scientists interested in discourse reference typology and the operations of working memory in linguistic communication *Dialogue and Discourse (RLE Linguistics C: Applied Linguistics)* Deirdre Burton, 2014-01-10 This book is based on a close study of modern drama texts In the first section Dialogue it studies specific drama texts Drama has been neglected by linguistic studies of literature and this book develops a new area of literary linguistic stylistics It demonstrates how recent advances in the sociolinguistic analysis of conversation discourse analysis can account for readers and audiences intuitions about dramatic dialogue The second section Discourse

uses these studies to develop a powerful and general model of spoken discourse As well as accounting for the utterance by utterance organization of dramatic texts it provides a descriptive model for the analysis of naturally occurring conversation Literary texts and natural conversation are used to illustrate each other

**Introduction to the Semiotics of the Text** Gianfranco Marrone,2021-11-08 This books aims to demonstrate how semiotic models of textual analysis can be used to study any social reality or cultural process In addition it shows how semiotic models work by using examples from everyday life and social praxis communicative processes and modes of consumption online interactions and cross media procedures political experiences and scientific universes
