Hohenheim who later called himself Paracelsus was the son of a physician His thirst for knowledge led him to study arts in Vienna then medicine in Italy but the instruction left him disillusioned He had learned to see nature with his own eyes undiluted by the teachings of books He was a rebellious spirit hard headed and stubborn who travelled all over Europe and the British Isles to practice medicine study local diseases and learn from any source he could humble as it might be In these years of wanderings Paracelsus developed his own system of medicine and a philosophy of theology all his own Though he wrote a great many books that covered a wide range of subjects only a few of his works were ever published in his lifetime When he died in Salzburg in 1541 one of the most forceful personalities of the Renaissance died with him Here are collected four treatises which illustrate four different aspects of Paracelsus work The first gives a passionate justification of his character activities and views and gives a picture of the man and his basic ideas The second treatise is a study of the diseases of miners with whom Paracelsus had spent a great deal of time Then follows a treatise on the psychology and psychiatry of Paracelsus Written at a time when mental diseases were beginning to be studied and treated by physicians this pioneering essay anticipates a number of modern views The last essay entitled A Book on Nymphs Sylphs Pygmies and Salamanders and on the Other Spirits is a fanciful and poetic treatment of paganism and Greek mythology as well as a good sample of Paracelsus philosophy and theology Together these essays show one of the most original minds of the Renaissance at the height of his powers
