Indicator Plants of Coastal British Columbia A. Ceska, A. M. Scagel, 2011-11-01 This original work makes unprecedented use of some of the most important research to date in plant ecology It is a guide for assessing site quality that is the climate and soil of particular forest and non forest ecosystems Foresters have long been interested in using plants as indicators in predicting the growth performance of reforestation sites but the data have not been readily available Indicator Plants of Coastal British Columbia fully discusses how indicator plants are recognized and demonstrates how indicator plants can be used in site diagnosis The book presents colour illustrations and descriptions of 419 selected vascular plants bryophytes and lichens of coastal British Columbia Indicators with similar values are grouped into indicator species groups which are used to evaluate site quality These data are supplemented by information on geographic distribution life form shade tolerance and other ecological characteristics of the species Three methods are given on how to use indicator plants for the purpose of site diagnosis Indicator Plants of Coastal British Columbia summarizes original research in a format which both students and practitioners will find easy to use

Plants of British Columbia Hong Qian, K. Linka, 1998 This book is an up to date checklist of the current valid taxonomy for all vascular plants bryophytes and lichens in British Columbia including synonyms species codes and other information A convenient geographically restricted comprehensive checklist like this one will aid greatly in avoiding the present confusion concerning the names of many species in the ecological and systematic literature as well as in applied fields The book is organized into three sections Part 1 organizes species alphabetically according to taxonomic order by families of vascular plants bryophytes and lichens Within each family the genera are listed alphabetically along with any synonyms former names and common names In Part 2 species are organized alphabetically according to their scientific names Part 3 lists common names followed by their scientific names Excluded names names inappropriately applied to plants in B C are given in an appendix Those familiar with plant taxonomy will find Part 1 particularly helpful when checking nomenclature semi professionals familiar with scientific names will use Part 2 and then Part 1 those who know only common names will check Part 3 and then Part 2 and Part 1 to determine families There is presently considerable confusion about many species names in B C Plant names change for many reasons and new plants invade Information about plants in B C is scattered in several checklists most of them incomplete or out of date for some species such as liverworts no provincial checklist even exists This checklist therefore will be useful to all professionals working with vegetation and for students in agriculture botany ecology forestry and other sciences Although the focus is on B C the book will also be useful outside the province particularly in the northwest American states and in Alberta and the Yukon
