Taylor, 2014-05-20 A groundbreaking work that reveals how the instinct to tend and befriend is vital for human society In times of crisis and upheaval our responses to stress become especially important We have long heard about the fight or flight response but renowned psychologist Shelley E

Taylor points out that hardwired in females both humans and those of other species is an instinct that can transcend fight or flight Their tend and befriend response is not only demonstrable but as Taylor deftly explains in this eye opening work a key ingredient in human social life With great skill and insight Taylor examines stress relationships and human society through the special lens of women s biology She draws on genetics evolutionary psychology physiology and neuroscience to show how this tending process begins virtually at the moment of conception and literally crafts the biology of offspring through genes that rely on caregiving for their expression Taylor also examines what drives women to seek each other s company and to tend to the young and the infirm acts that greatly benefit the group but often at great cost to the individual The Tending Instinct will forever change the way we view ourselves and will revolutionize our understanding of the role of women and nurturing in maintaining a stable society
