Craig,2017-03-27 The White Spaces of Kenyan Settler Writing provides an overview of Kenyan literature by white writers in the half century before Independence in 1964 Such literature has been over shadowed by that of black writers to the point of critical ostracism It deserves attention for its own sake as the expression of a community that hoped for permanence but suffered both disappointment and dispossession It deserves attention for its articulation of an increasingly desperate colonial and Imperial situation at a time when both were being attacked and abandoned in Africa as in other colonies elsewhere and when a counter discourse was being constructed by writers in Britain as well as in Africa Kenya was likely the best known twentieth century colony for it attracted publicity for its iconic safaris and its Happy Valley scandals Yet behind such scenes were settlers who had taken over lands from the native peoples and who were trying to make a future for themselves based on the labour willing or forced of those people This situation can be seen as a microcosm of one colonial exercise and can illuminate the historical tensions of such times The bibliography is an attempt to collect the literary resources of white Kenya in this historically significant period **African Language Review** David Dalby,2013-12-16 First published in 1971 The Sierra Leone Language Review is the African Language Journal of Fourah Bay College the University College of Sierra Leone The Journal is devoted to the detailed study of languages in Sierra Leone and neighbouring areas of West Africa and also to the more general study and discussion of African languages and language problems **Language Typology and Syntactic Description: Volume 1, Clause Structure** Timothy Shopen,1985-07-25 The three volumes of Language Typology and Syntactic Description offer a unique survey of syntactic and morphological structure in the languages of the world Topics covered include parts of speech passives complementation relative clauses adverbial clauses inflectional morphology tense aspect and mood and deixis The major ways these notions are realized in the languages of the world are explored and the contributors provide brief sketches of relevant aspects of representative languages Each volume is written in an accessible style with new concepts explained and exemplified as they are introduced Although each volume can be read independently together they provide a major work of reference that will serve as a manual for field workers and anyone interested in cross linguistic generalizations **Essays on Language Function and Language Type** Joan L. Bybee,John Haiman,Sandra A. Thompson,1997-01-01 In their subject matter and in their theoretical orientation all the papers in this volume reflect the powerful influence of T Giv n Most of them deal with questions of

morphosyntactic typology pragmatics and grammaticalization theory Many of them are directly based on extensive fieldwork on local languages of the Americas Africa Asia and the Pacific Others are based on statistical analyses of extensive written and spoken corpora of texts

The Passive ANNA SIEWIERSKA, 2024-05-01 First published in 1984 The Passive surveys a wide range of different constructions which have all been termed passives by linguists using data from a large number of genetically and typologically diverse languages Chapter 1 raises questions about the nature of passives and exposes some of the difficulties inherent in the traditional assumptions Chapter 2 examines the personal passive and includes a discussion on the relationship between the passive and transitivity Chapter 3 to 5 deal with impersonal periphrastic and reflexive passives exploring the varied problems raised by each construction and focusing particularly on English and Southeast Asian languages The two final chapters look at various attempts to explain exceptions to the passive in both semantic and syntactic terms with an additional section on pragmatics This book will appeal to all of those involved in the field of comparative linguistics

Historical Linguistics 1991 Jaap van Marle, 1993-08-06 This volume contains 22 of the 95 papers presented during ICHL 10 The articles included here clearly reflect the on going interest in the general mechanisms of language change the close relationship between present day historical linguistics and linguistic theory and the renewed interest in language contact The papers deal with more general issues as well as with specific problems in diverse languages and language groups The volume contains three indexes of names of languages and of subjects
