## **Song Legend From The Middle Ages:**

*Song and Legend from the Middle Ages* William D. McClintock, 2016-03-06 From the PREFACE The aim of this little book is to give general readers some idea of the subject and spirit of European Continental literature in the later and culminating period of the Middle Ages the eleventh twelfth and thirteenth centuries It goes without saying that translations and selections are in general inadequate to the satisfactory representation of any literature No piece of writing of course especially no piece of poetry can be perfectly rendered into another tongue no piece of writing can be fairly represented by detached portions But to the general English reader Continental Mediaeval literature so long as it remains in the original tongues is inaccessible and translations of many entire works are not within easy reach What translation and selection can do in this case is to put into the hands of the ordinary student of the Middle Ages sufficient material for forming an estimate of the subjects that interested the mediaeval mind and the spirit in which they were treated And this is what the general reader desires Matters of form and expression the points that translation cannot reproduce belong of course to the specialist The claim that so slender a volume of selections can represent even the subject and spirit of so vast a body of literature is saved from being unreasonable or presumptuous by a consideration of the fact that from causes easy to trace the national literatures of Continental Europe had many common characteristics the range of subjects was not unlimited the spirit is the same in all No English is included for two reasons Mediaeval English literature is easily accessible to those readers for whom this book is prepared during the special period in which the best mediaeval literature was developed England was comparatively unproductive The constant aim has been to put before the reader the literature itself with comment barely sufficient to make an intelligible setting for the selections Criticism of all kinds has been avoided so that the reader may come to his material with judgment entirely unbiased The translations used have been selected largely with a view to their accessibility so that readers who desire to enlarge the scope of their reading may easily find the books they need Caxton's Reynard the Fox and The Romance of the Rose attributed to Chaucer were chosen because they convey an impression of the quaint flavor of the original which is lost in a modern version The slight adaptations and transliterations made in these two selections are entirely defensible on the score of intelligibility Our acknowledgments are due to Prof William I Knapp of the University of Chicago for the use of books from his valuable library and for the permission most highly prized to print for the first time some of his translations of the Cid ballads

This book explores the role of music in the some five hundred feature length films on the Middle Ages produced between the late 1890s and the present day Haines focuses on the tension in these films between the surviving evidence for medieval music and the idiomatic tradition of cinematic music The latter is taken broadly as any musical sound occurring in a film from the clang of a bell off screen to a minstrel singing his song Medieval film music must be considered in the broader historical context of pre cinematic medievalisms and of medievalist cinema's main development in the course of the twentieth century as an American appropriation of European culture The book treats six pervasive moments that define the genre of medieval film the church tower bell the trumpet fanfare or horn call the music of banquets and courts the singing minstrel performances of Gregorian chant and the music that accompanies horse riding knights with each chapter visiting representative films as case studies These six signal musical moments that create a fundamental visual aural core central to making a film feel medieval to modern audiences originate in medievalist works predating cinema by some three centuries
