marginalization of women animals and indigenous peoples and hence expand the constrained discipline of IR By rethinking international relations to put ecological foundations first we are pushed to think and act with consideration of the long term sustainability of the global environment an ecological focus reminds us of our interdependence with our environment and all our neighbours The book raises conceptual and methodological issues that go directly to the heart of current critical engagements within the discipline of IR As such it will be of great interest to students and researchers in IR environmental politics and political theory
