Excavation of Two Anasazi Sites in Southern Utah, 1981 The two reports published here contain elements which contribute substantially to this broader spectrum of Southwestern cultural change While primarily descriptive in nature these two site reports one from the western Kayenta area and one from the margin of the Mesa Verde area and the eastern Kayenta suggest that the changes which occurred in the more centralized portions of these regions were directly related to what happened on the margins That while the site densities and population aggregates may not have been as high the same factors affected these marginal areas That conclusion could be expected but what may not be expected is the differential response which appears to have occurred After reading these two reports it appears that it may be possible to discern elements of change in these fringe areas that once defined will provide new insight into what happened and why and in what are presently the better known areas of the Southwest These two papers are important in sum not only because they are reports of work in poorly known areas but because they do provide analyses of fringe areas they help us to understand the Southwest generally From preliminary introduction

The Scorpions of the Western Part of the United States Henry Ellsworth Ewing, United States National Museum, 1929 **Proceedings of the United States National Museum** United States National Museum, 1929 Mochlos III Natalia Vogeikoff-Brogan, 2014-12-31 This volume presents the first of several Late Hellenistic buildings that were uncovered on the island of Mochlos located off the northeastern coast of Crete during the Greek American excavations of the last 25 years It also provides an introduction to the Hellenistic settlement that flourished on the island for nearly a century before it was abandoned The Hellenistic remains overlay much of the Late Minoan III and Neopalatial settlement Due to the excavation of both the Bronze Age and later phases of the town the publication of this Hellenistic building includes paleoenvironmental material among all the other artifacts which is often neglected in excavations of historical material The role that Mochlos played in East Crete is discussed and conclusions are drawn about its relations with Hierapytna during the Late Hellenistic period Life on the Edge: The Neolithic and Bronze

progresses from fundamental principles of lithic analysis such as raw material identification and knapping techniques to examining stone tool technology developments across different regions and time periods Case studies from Africa Europe Asia and the Americas highlight each region s unique lithic industries By integrating excavation records experimental archaeology and GIS mapping *Ancient Stone Tools* offers a comprehensive overview of the field This study emphasizes the evolution of stone tool technologies as a reflection of the increasing complexity of human societies and their environment providing an up to date and accessible synthesis of current knowledge for students researchers and anyone interested in human origins and prehistoric cultures *Journal of Northwest Anthropology* Roderick Sprague, An Introduction to Herbert W Krieger s Work on the Columbia River Darby C Stapp Archeological Excavations in the Columbia River Valley Herbert W Krieger Prehistoric Inhabitants of the Columbia River Valley Herbert W Krieger A Prehistoric Pit House Village Site on the Columbia River at Wahluke Grant County Washington Herbert W Krieger Salvaging Early Cultural Remains in the Valley of the Lower Columbia River Herbert W Krieger Comparison of Two Village Tourism Development Models in Fenghuang County China First Prize Graduate Student Paper 60th Annual Meeting of the NWAC Xianghong Feng An Analysis of Mandibular Molar Occlusal Size Progression Patterns in Three Species of Australopithecines First Prize Undergraduate Student Paper 60th Annual Meeting of the NWAC Jamie M Litzkow *Fractures in Knapping* Are Tsirk, 2014-11-17 This book is for students and practitioners of not only knapping lithic technology and archaeology but also of fractography and fracture mechanics In general understanding of fractures provides a sounder basis for lithic analysis and use of more recent scientific tools opens new avenues for lithic studies Investigations at the Pueblo Alto Complex, Chaco Canyon, New Mexico, 1975-1979: pt. 1-2. Artifactual and biological analyses Thomas C. Windes, 1988 **Meridians of Salt** Paul N. Eubanks, Ashley A. Dumas, Heather McKillop, Marius Alexianu, 2025-09-26 This book explores the relationship between salt sodium chloride and the development of human societies from a cross cultural and global perspective Although it is not possible to discuss the importance of salt to all ancient and modern societies the geographically and temporally diverse examples highlighted here are used to examine a series of related topics critical to understanding the economic political social and religious impacts of salt through space and time These topics include among others the techniques used to produce salt the individuals responsible for its production its cultural uses and applications its role in cross cultural exchange and the impact of its circumscribed distribution on settlement patterns and developing complexity In exploring these topics the chapter authors rely on archaeological data to craft their interpretations however as salt itself is largely invisible in the archaeological record other avenues of investigation such as ethnoarchaeology ethnohistory and experimental archaeology are necessary to gain a more complete understanding of this mineral s influence on the development of human cultures Each chapter includes a summary of seminal research within a particular geographic region along with a discussion of recent or on going projects from that area This volume is intended for a professional audience but university students and graduates and readers with an

interest in anthropology archaeology ethnoarchaeology or history will find the chapters comprehensible and informative
