Social Influences and Socialization in Infancy S. Feinman, Michael Lewis, 2013-06-29 How are we to understand the complex forces that shape human behavior A variety of diverse perspectives drawing on studies of human behavioral ontogeny as well as humanity's evolutionary heritage seem to provide the best likelihood of success It is in an attempt to synthesize such potentially disparate approaches to human development into an integrated whole that we undertake this series on the genesis of behavior In many respects the incredible burgeoning of research in child development over the last two decades or so seems like a thousand lines of inquiry spreading outward in an incoherent starburst of effort The need exists to provide on an ongoing basis an arena of discourse within which the threads of continuity among those diverse lines of research on human development can be woven into a fabric of meaning and understanding Scientists scholars and those who attempt to translate their efforts into the practical realities of the care and guidance of infants and children are the audience that we seek to reach Each requires the opportunity to see to the degree that our knowledge in given areas permits various aspects of development in a coherent integrated fashion It is hoped that this series which brings together research on infant biology developing infant capacities animal models and impact of social cultural and familial forces on development and the distorted products of such forces under certain circumstances serves these important social and scientific needs

Intervention Programming for Preschoolers rests on the idea that young children under optimal circumstances develop substantial abilities in social and emotional domains by the time they enter school. These abilities contribute to their success and well being during these early years but even more importantly to both their successful adaptation to school personal and academic and their long term mental health. The chapters of this volume present theoretical foundations for and explanations of what important adults in young children's lives preschool teachers daycare providers parents can do to encourage the development of such social emotional abilities including promoting secure attachment relationships providing positive behavior guidance and assisting children in developing emotion knowledge emotion regulation social problem solving skills and other positive social behaviors. In addition the book reviews the current state of early childhood programming in each of these crucial areas with the addition of a chapter on emergent parent programming on emotion coaching. Recommendations are made for making such programming work for assessing individual children's development and program efficacy and necessary future directions for this area are detailed.
