Social Goals And Educational Reform:

Social Goals and Educational Reform Charles V. Willie, Inabeth Miller, 1988-11-03 This collection provides a multidisciplinary perspective on the development of educational policy and practice in the United States during the past century. It presents education as a complex social structure and process that has changed through the years and that defies simplistic solutions. By reviewing competing theories of education, the editors promote an analytical framework that welcomes educational conflict as creative and beneficial. World Educational Reforms Prem Lata Sharma, 2004 Psychological Theory and Educational Reform David R. Olson, 2003-06-16 For well over a century, educational reformers have looked for a breakthrough in the sciences of psychology and pedagogy that would dramatically improve the effectiveness of schooling. This book shows why such an ambition is an illusion. Schools are institutions which attempt to balance the needs of a bureaucratic society that funds them with the personal goals, interests, hopes, and ambitions of the students who enroll in them. Reform efforts attempt to realign that balance without any clear conception of how the two are related. This book offers a theoretical account of the relation between the minds of learners and the institutional structure of the school that would account both for the ways that schooling remakes minds and societies and why such institutions are resistant to change.

Deconstructing Higher Education Reforms in India Kurmana Simha Chalam, 2011 **Education Reform in Societies in Transition** Jaya Earnest, David F. Treagust, 2006 Framed against the background of educational change, this book proposes to examine the relationship between curriculum change, teacher professional development, policy reform, and the processes of educational change. The main aims of the book are to: 1. focus on educational changes and reconstruction in transitional societies that have undergone political, economic, and social change in the past two decades; 2. provide a forum for the dissemination of research on education, reconstruction, and reform in transitional societies; 3. disseminate ideas that enhance both the practical and theoretical aspects of educational changes in these societies; 4. further knowledge and understanding of emerging trends and issues in education in these societies; 5. reflect the realities of educational scenarios in each transitional society. The book presents an in-depth exploration of educational reconstruction in 15 transitional societies. In each chapter, the authors have provided an overview of educational processes in the country, a distillation of education change or reform, and or reconstruction in each transitional society. Collectively, the chapters in the book have attempted to contribute to a better understanding of the educational system in respective countries by identifying the challenges and obstacles, the policy implications, the teacher professional development needs, and curriculum reform efforts. **Educational Research and Policy: How Do They Relate?** Torsten Husén, Maurice Kogan, 2014-05-17 *Educational Research and Policy: How Do They Relate* contains the proceedings of a four-day symposium held at Wijk Lidingö, Stockholm, in June 1982.
