educational improvement and reflecting on policy issues The analyses and reflections in this book provide timely insight into international educational discourse policy practice and research in an area of education that is becoming increasingly important for many societies Citizenship Education Nader Al-Refai, Christopher Adam Bagley, 2008-01-01 This important book draws together and integrates several strands in educational policy It offers a perspective on the role of Britain s increasing Muslim population and the need for Citizenship Education for all school pupils which can allow young Muslims to integrate in ways which meet their legitimate needs for expression of religious values and which fosters tolerance in both Muslim pupils and in their peers as well as responsible participation in the wider democracy. The book explains clearly the meaning of education and citizenship in Islam and argues that the practice of Islam encourages its adherents both to tolerate other religions and the societies in which Islamic minorities have settled In this account there is no logic morality or theological support for violent acts against the state However increasing Islamophobia misdirected against Muslim youth in Britain has forced a reappraisal of identity This combined with increasing dissatisfaction of Muslim parents on the failure of mainstream schools to tolerate the religious aspirations of their children has led to the setting up of a number of Muslim schools in Britain Recent government actions to introduce Citizenship Education in all schools as a means of fostering tolerance and countering political apathy are evaluated in a study of five best practice Muslim schools and five similar schools serving a wider religious population Results show the general success of Citizenship Education in the Muslim schools studied and support the argument that Islamic education can support Citizenship Education in socially productive ways While focussed on Britain this book is an important comparative study of education sociology and social policy and deserves to be read by trainee teachers undergraduates and policy makers in the fields of education and social planning Education at the Crossroads Phillip Hughes, 2006-09-23 Education is a universal priority Currently it is at a crossroad In every society it is valued as a major road to produce more productive more harmonious and healthier citizens Yet in every setting there is deep dissatisfaction with the overall performance of education and there are major moves towards reform sometimes superficial but more often fundamental These reform processes have had only moderate and very uneven success Too often they are episodic reflecting a short term approach which is frequently changed for the latest enthusiasm or the most recent administration In Asia and the Pacific countries many systems are in the process of construction or reconstruction Can we learn from the experiences of others Given the multiplicity of efforts at reform and the variety of situations for reform there may well be lessons we can learn from each other s efforts and each others failures and successes This book features contributions from experienced researchers who have worked in many different settings and bring their own insights to attack this universal problem Citizenship for Primary Schools Institute for Citizenship, 2000 Helping teachers address citizenship education efficiently this title is linked to the non statutory Framework for PSHE and Citizenship in the National Curriculum It provides lesson plans photocopiable resource sheets and ideas for discussion and extension

work It also gives guidance on using the lesson plans Flipover Books and Photopacks
