Social Organization Charles Horton Cooley, 1983 The Permanently Connected Group (PeCoG) Katharina Knop-Hülß, 2023-11-03 The small group uniquely benefits from the ubiquitously available connective possibilities of mobile communication technologies The group chat feature of mobile instant messaging applications MIMAs e.g. WhatsApp Signal provides small groups with a permanently accessible communication place where members can relay information to all others at once independent of their spatiotemporal location The resulting permanent collective addressability PCA of members has implications for group processes e.g. group coordination socio-emotional concerns of members This book investigates the communicative activity in MIMA chats of 18 naturally occurring goal-oriented groups in a non-professional setting using a standardized content analysis It thus extends findings on individual level expectations of permanent connectedness and shows how a group using such technology can be understood as a permanently connected group PeCoG and group level manifestation of the hybridity of mediated and face-to-face communication constituting our current communication reality Above all this book demonstrates the potential of small group research to describe current phenomena relevant to communication science

Subject Guide to Books in Print, 1993 **Die Sozialität des Handelns** Frithjof Nungesser, 2021-06-23 Handeln Denken

und Identität sind von Grund auf sozial. Menschliche Individuen sind motivational auf Sozialität hin ausgerichtet; ihre Identität wird in Sozialität ausgebildet und revitalisiert; ihr Handeln und Denken wird durch Sozialität strukturiert. Diese These einer konstitutiven Sozialität des Handelns findet sich im klassischen Pragmatismus konsequent ausformuliert. Frithjof Nungesser analysiert die konflikt- und folgenreichen Entstehungsbedingungen sowie die inneren Zusammenhänge und Spannungen dieser Theorieposition. Darauf aufbauend reformuliert er sie im Rückgriff auf aktuelle lebenswissenschaftliche Befunde insbesondere aus Primatologie, Linguistik, Kultur und Entwicklungspsychologie. So wird der Pragmatismus als eine Sozialtheorie sichtbar, die Evolution, Handeln und kulturelle Entwicklung in nicht-reduktionistischer, innovativer und empirisch haltbarer Weise verknüpft.

The New Institutionalism in Sociology Mary C. Brinton, Victor Nee, 2001. Institutions play a pivotal role in structuring economic and social transactions and understanding the foundations of social norms; networks and beliefs within institutions is crucial to explaining much of what occurs in modern economies. This volume integrates two increasingly visible streams of research: economic sociology and new institutional economics, to better understand how ties among individuals and groups facilitate economic activity alongside and against the formal rules that regulate economic processes via government and law. Reviews: This volume is a welcome addition to the expanding literature on institutional analysis. Besides sociologists, we are afforded the pleasure of contributions from anthropologists, economists, historians, political scientists, and scholars located in schools of law and education. One of the pleasures of the volume is the wide range of topics, times, and locales addressed by the authors. In all these diverse situations, the application of institutional queries and approaches enhances our understanding and appreciation of the endlessly rich and diverse nature of social life. Contemporary Society. This admirable book makes a strong contribution to institutional theory; has many excellent chapters; and is a model for interdisciplinary exchange and cross-fertilization. It is dense with interesting ideas and points for debate, and I heartily recommend it. Sociological Research Online.

Classic Anthropology John William Bennett, *Classic Anthropology* is Bennett's label for the work produced by anthropologists during the period 1915-1955, which many believe represents the most productive era in the discipline's history. It is also one that can never be repeated, given the fact that most of anthropology's basic data—the ideas and customs of tribal peoples—have been extinguished or greatly transformed by modernization and nationalization. The book is composed of some fifteen essays. Among the issues examined are the emergence of a functionalist viewpoint in ethnology; the difficulties of developing a theory of human behavior because of the focus on culture; the search for concepts of culture to serve specialized needs; the neglect of social psychology by the culture and personality field; how value judgments emerged, willy-nilly, or conversely were neglected in ethnological research; how applied anthropology was challenged by Action Anthropology; and how the interdisciplinary anthropology of the late 1940s was submerged in the postwar effort to return the discipline to traditional roots. Individual anthropologists whose work is examined include, among others, Bronislaw Malinowski, Leslie Spier, Alfred Kroeber, Ralph Linton, Margaret Mead, Ruth
