

The background is a solid teal color. Overlaid on this are several concentric, slightly offset rectangular frames in black and white, creating a sense of depth and architectural structure. A black silhouette of a person is positioned in the lower half of the image, appearing to be in a dynamic, possibly dancing or expressive pose, with arms and legs extended. The title text is printed in a bold, white, serif font, partially overlapping the silhouette and the geometric lines.

takes into account influences from other cultures and sources as well as eschews thick conceptions that stifle imaginations and imaginaries This book will be of interest to academics in the fields of philosophy political science sociology literature and cultural studies in general and contemporary political theory South Asian and Indian politics and political theory in particular

*The Knowledge-based Economy* Loet Leydesdorff, 2006 Challenging theoretically rich yet anchored in detailed empirical analysis Loet Leydesdorff s exploration of the dynamics of the knowledge economy is a major contribution to the field Drawing on his expertise in science and technology studies systems theory and his internationally respected work on the triple helix the book provides a radically new modelling and simulation of knowledge systems capturing the articulation of structure communication and agency therein This work will be of immense interest to both theorists of the knowledge economy and practitioners in science policy Andrew Webster Science Technology Studies University of York UK

This book is a ground breaking collection of theory and techniques to help understand the internal dynamics of the modern knowledge based economy including issues such as stability anticipation and interactions amongst components The combination of theory measurement and modelling gives the necessary power with which to address the complexity of modern networked social systems Each on its own would partly illuminate an innovation system but the combination sheds a far brighter light Mike Thelwall Information Science University of Wolverhampton UK

The sociologist Niklas Luhmann is considered one of the few social scientists possibly able to explain a decisive event once it has happened In this book Loet Leydesdorff answers the challenge to take Luhmann s analysis one step further by introducing anticipation

into the theory This book provides a fascinating exploration of the use of recursion and incursion to model social processes  
Dirk Baecker Sociology Universit t Witten Herdecke Germany \_\_\_\_\_ How can an economy  
based on something as volatile as knowledge be sustained The urgency of improving our understanding of a knowledge based  
economy provides the context and necessity of this study In a previous study entitled A Sociological Theory of  
Communications The Self Organization of the Knowledge based Society 2001 the author specified knowledge based systems  
from a sociological perspective In this book he takes this theory one step further and demonstrates how the knowledge base  
of an economic system can be operationalized both in terms of measurement and by providing simulation models
