The Free Man's Library Henry Hazlitt,1956 *Frontier Thinking and Human-Nature Relations* E. C. H. Keskitalo,2024-06-12 Combining historical social and regulative analysis this book builds a compelling critique of frontier thinking as it continues to form our assumptions about social and environmental organisation in ways that impact not least the present environmental crisis This book systematically identifies the ways in which images of nature and society are formed by the historically developed frontier oriented narratives which have underpinned much Anglo American and Anglocentric thought The book confronts these conceptions at large showing that they never held empirically and contrasts them with the situation in northern Europe where diverging assumptions are integral to this day Through this juxtaposition this book illustrates not only the pervasiveness of structures of understanding in steering policy but also the varying traditions regarding how understandings of the environment can be formed This study highlights how historical thought patterns formed for very different reasons than exist today continue to shape our assumptions about nature the relation between urban and rural areas and our understanding of ourselves in relation to the environment This book will be of wide interest to a range of academics and students in the fields of geography anthropology environmental studies sociology political science and development studies amongst others The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Faith and Action R. J. Rushdoony,2019-08-26 Faith and Action is the complete collection of the essays of R J Rushdoony written for the Chalcedon Report between 1965 and 2001 along with several transcripts of his recorded talks The large volume The Roots of Reconstruction only contained his Chalcedon Report essays up until 1985 so most of the essays included in Faith Action were unavailable to readers for many years until now In order to make the author s knowledge more accessible this three volume collection features some of the most extensive indexing we ve ever done including a General Index a History Index a Scripture Index a Works Cited Index and a Chalcedon Report Directory A total of 183 pages of indexing This handsome set of

books is a must have for any serious library The central theme of this collection of essays is Christian Reconstruction which to Rushdoony meant the responsibility of Christian citizenship in the Kingdom of God For him his central drive behind his research and writing was to move men to faith and action Rushdoony was primarily an essayist who vigorously and prolifically wrote on a multiplicity of subjects issues and disciplines Despite his being critical of both the contemporary church for its compromise and the humanistic state for its will to be as God these essays are replete with Rushdoony's undying faith in the victory of God in history Rushdoony's big idea was Christian Reconstruction which centered not on a pursuit of political power but rather an equipping of Christians to take back government by means of self government in terms of God's law This three volume collection will no doubt serve the larger church for many generations as they seek first the Kingdom of God in their spheres and in their times

Social Reconstruction Karen L. Riley, 2006-05-01 Social Reconstruction as a philosophy stream of thought or official program is often synonymous with Depression era Progressivism But Social Reconstruction unlike progressivism enjoyed political stardom The spirit of progressivism at least in terms of education found a home in those enthusiasts who supported a child centered perspective of education Others such as the essentialists viewed their progressive role as one that advanced the view of essential or basic education as the most sound approach to curriculum and teaching Still others more radical in their outlook believed that progress should be framed with questions about social justice and equity Proponents of social reconstruction included Harold Rugg and George Counts although the movement was rich with supporters To date social reconstruction is only a by word in most texts that deal with the Progressive Era or progressive education perhaps because Rugg and Counts the two most visible proponents sought and received the political limelight no matter how glaring In any event the depths of social reconstruction have yet to be plumbed Hence the first book in this series will offer a comprehensive treatment of Social Reconstruction which include chapters that examine its proponents political nature and social justice programs born of and within the tumultuous context of progressive politics
