Challenging Oppression and Confronting Privilege Robert P. Mullaly, 2010 First ed published under title Challenging oppression

Collective Morality and Crime in the Americas Christopher

Birkbeck,2012-12-07 This study examines the ways in which the moral community is talked into being in relation to crime and the objects of concern that typically occupy its attention It maps the imagined moral universe of the virtuous and the criminal and charts the relations between these two groups in the history of the present It examines the calls to action which symbolically endow the moral community with power And it looks at the character and content of collective moralizing The source materials are commentaries about crime and criminal justice appearing in selected newspapers across the Americas The moral talk found there is stylized routine trivial and occasionally dramatic It looks nothing like the weightier renderings of morality that derive from the reconstruction of a particular ethic or from the systematic probing of values and moral reasoning And its fuzzy offhand unexceptional and frequently unsystematic nature makes it a difficult candidate for explaining either stability or change in crime policies But moral talk has intrinsic importance as the creator and sustainer of an imagined moral community a community that symbolizes the existence and vigor of morality itself and confers a crucially important identity on its self proclaimed members And moral talk reveals inherent intersections between normative empirical and technical discourses highlighting the relationships between morality science and social engineering Thus a prosaic instrumental model of morality is particularly strong in North America but only found in a more abstract form in Latin America where it sits alongside a stirring vision of morality more directly anchored in virtue Research on social problems moral panics and the sociology of morality has largely overlooked the type of moral discourse studied here While emphasizing the culturally contingent nature of the findings the conclusion reflects on their significance for understanding the nature of moralizing the artifacts of talk and the construction of identity *Globalizing Issues* Erik Neveu,Muriel Surdez,2020-09-07 This book is an invitation to question conventional and often misleading visions of globalization No problem is global by nature issues are transformed by the action of claims makers to become problems debated in supra national forums triggering policy choices and policy transformations Contributions highlight how health issues environmental issues and or political issues are framed as global by a set of stakeholders scientific experts bureaucrats political parties or actors social movements social networks firms As the volume maps the social logic behind the globalization of problems it also presents an opportunity for the very cross disciplinary collaboration it calls for researchers mobilizing the agenda setting paradigm of issue globalization and those working within the social constructionist model are both represented here providing a unique opportunity to examine the dynamics of globalization from the perspectives of political media economic sociology international relations social movement studies and beyond **Forthcoming Books** Rose Arny,2000

Constructing Social Problems Malcolm Spector, There is no adequate definition of social problems within sociology and there is not and never has been a sociology of social problems That observation is the point of departure of this book The authors aim to provide such a definition and to prepare the ground for the empirical study of social problems They are aware that their objective will strike many fellow sociologists as ambitious perhaps even arrogant Their work challenges

sociologists who have over a period of fifty years written treatises on social problems produced textbooks cataloguing the nature distribution and causes of these problems and taught many sociology courses It is only natural that the authors work will be viewed as controversial in light of the large literature which has established a sociology of a wide range of social problems the sociology of race relations prostitution poverty crime mental illness and so forth In the 1970s when the authors were preparing for a seminar on the sociology of social problems their review of the literature revealed the absence of any systematic coherent statement of theory or method in the study of social problems For many years the subject was listed and offered by university departments of sociology as a service course to present undergraduates with what they should know about the various social pathologies that exist in their society This conception of social problems for several decades has been reflected in the substance and quality of the literature dominated by textbooks In *Constructing Social Problems* the authors propose that social problems be conceived as the claims making activities of individuals or groups regarding social conditions they consider unjust immoral or harmful and that should be addressed This perspective as the authors have formulated it conceives of social problems as a process of interaction that produces social problems as social facts in society The authors further propose that this process and the social facts it produces are the data to be researched for the sociology of social problems This volume will be of interest to those concerned with the discipline of sociology especially its current theoretical development and growth Malcolm Spector was professor of sociology at McGill University in Montreal Canada John I Kitsuse is professor emeritus at the University of California at Santa Cruz He is co author with Leonard Broom of *The Managed Casualty The Japanese American Family in World War II* and co editor with Theodore R Sarbin of *Constructing the Social*

Developing Countries George Ofori, 2012-06-26 Economic growth and socio economic development are particularly important for developing countries and the construction industry plays a central role in driving both of these Traditionally the issues faced have been assumed to be merely offshoots of those encountered in industrialised nations and are usually discussed only in this context In addition research in construction management and economics has generally failed to take proper account of the unique or highly emphasised characteristics of the industries in developing countries or their economic and social environment This volume challenges underlying assumptions and focuses on the distinct characteristics of construction in developing countries In so doing it considers the issues from the perspective of the developing countries themselves to present a strong contemporary picture for researchers It forms a companion volume to New Perspectives on Construction in Developing Countries which provides an update on the generic subjects relating to the construction industry in developing countries and covers new concepts and issues **Proceedings of the Canadian Society for Civil**
