Social Responses To Technological Change:

Social Responses to Technological Change Augustin Brannigan, Sheldon Goldenberg, 1985-11-14 Social Responses to Large Technical Systems Todd R. La Porte, 2012-12-06 This volume stems from the efforts of scholars who seek to understand the social dynamics of large technical systems The purpose is to develop concepts and empirical knowledge concerning the dynamics of such systems with particular emphasis on the processes of control and or management in a variety of national settings and to improve the basis of public policy so that future developments might be less distressing in consequence and more shaped to the desires of their host societies One vehicle for this enterprise is a series of international conferences on the Evolution and Dynamics of Large Technical Systems LTSs This series was instituted to encourage the coalescence of the multidisciplinary group of scholars who are actively engaging in the empirical study of these phenomena Their disciplines span history sociology political science and economics studies They come Australia France the Netherlands Norway Sweden the United Kingdom the United States and West Germany And they possess strong backgrounds in the empirical study of specific technical areas and a taste for conceptual and theoretical integration Environmental Change and the Social Response in the Amur River Basin Shigeko Haruyama, Takayuki Shiraiwa, 2014-12-02 This book features research on historical land use and land cover in the Amur River Basin which are important not only for residents there but also for those affected by its material and water cycles Land use and land cover are affected by natural and human interactions over long and short timescales The authors address historical changes in the land cover analysis of the Amur The Amur region of Russia land cover change analysis of the Amur wetland and flooding of the Amur provide evidence of land cover change Changes of wetland and floodplain sedimentation processes demonstrate the influences of land cover change on fluvial environment which are discussed with geomorphology Water chemistry is showing the physical dimension of the geography of the Amur The development process of timber harvesting in the Khabarovsk area and land use dynamics in the twentieth century are important evidence of development The Amur poses an essential question how can we manage a transboundary watershed without disturbing terrestrial and marine ecosystems for future generations This book provides essential information for geographers about this relatively unknown region **The Psychology of Organizational Change** Shaul Oreg, Alexandra Michel, Rune Todnem By, 2023-10-12 This volume brings together recent insights about the psychology of organizational change The authors are leading scholars in the study of organizational change taking on a micro perspective for understanding the process through which responses to change emerge and impact work related outcomes Each chapter approaches the topic from a different perspective highlighting a different aspect of the phenomenon The book includes review chapters chapters with new theoretical developments and descriptions of empirical studies and their findings It is intended for both academic and practitioners who wish to keep up to date about the mechanisms that explain how recipients of organizational change respond to and cope with change **Growth Policy in the Age of High Technology**

Jurgen Schmandt, Robert Wilson, 2018-03-29 Originally published in 1990 this book provides an authoritative and detailed account of the initiatives of US state governments with science and technology programs designed to foster economic growth Two key questions are posed Do state governments have policy instruments that are sufficiently powerful to affect the levels and growth rates of their regional economies and Are national and global economic forces so powerful that they render state action ineffective Several subsidiary themes are discussed in this context namely the most commonly used policy instruments the impacts on federalism and on governance and how well the universities and other educational institutions serve the economic activities imposed on them

Science-Based Lawmaking Dionysia-Theodora Avgerinopoulou, 2019-08-31 The Book takes the approach of a critique of the prevailing international environmental law making processes and their systemic shortcomings It aims to partly redesign the current international environmental law making system in order to promote further legislation and more effectively protect the natural environment and public health Through case studies and doctrinal analyses an array of initial questions guides the reader through a variety of factors influencing the development of International Environmental Law After a historical analysis commencing from the Platonic philosophy up to present the Book holds that some of the most decisive factors that could create an optimized law making framework include among others progressive voting processes science based secondary international environmental legislation new procedural rules that enhance the participation in the law making process by both experts and the public and also review the implementation compliance and validity of the science base of the laws The international community should develop new law making procedures that include expert opinion Current scientific uncertainties can be resolved either by policy choices or by referring to the so called sound science In formulating a new framework for environmental lawmaking processes it is essential to re shape the rules of procedure so that experts have greater participation in those in order to improve the quality of International Environmental Law faster than the traditional processes that mainly embrace political priorities generated by the States Science serves as one of the main tools that will create the next generation of International Environmental Law and help the world transition to a smart inclusive sustainable future

Technological Change Clotilde Coron, Patrick Gibert, 2020-04-09 Technological change is exciting as much as it is daunting The arrival of new digital tools affects consumption patterns types of employment and working conditions and can pose challenges to organizations and individuals alike Indeed although technological change is a factor for economic growth it can also be an amplifier or even a catalyst of inequality It is also a social change and interacts in complex ways technology is both the source and the consequence of social transformation To understand technological change and to harness its effects this book studies transformations at different levels societal organizational and individual In its analysis of the subject it also draws on a number of disciplines of the human and social sciences such as anthropology sociology and psychology
