Social System Accounts:

Social System Accounts K. Fox, 2012-12-06 This book results from a research program on which I have spent most of my time since 1974 It addresses two of the major problems facing social system accounting how to measure and account for nonmarket activities and how to combine social and economic indicators The solution I propose is accounts based on behavior settings a concept originated by Roger G Barker more than thirty years ago Behavior settings are the natural units of social activity into which people sort themselves to get on with the business of daily life grocery stores school classes religious services meetings athletic events and so on The descriptive power of behavior settings has been established in surveys of complete communities in the United States and England of high schools ranging in size from fewer than 100 to more than 2000 students of rehabilitation centers in hospitals and of several other types of organizations Behavior settings are empirical facts of everyday life A description of a community or an organization in terms of behavior settings corresponds to common experience In many cases small establishments are behavior settings the paid roles in behavior settings are occupations and the buildings and equipment of establishments are the buildings and equipment of behavior settings *Social*

Social Accounting Systems M. Yanovsky, Social accounting grew up as a result of the desire to bring together in a meaningful and comprehensive manner all the available observed facts on the economic and financial activity of a nation Three social accounting systems of flow have been developed during the last three decades Each of these systems has been constructed separately and independently The framework of each system is constructed to tackle specific aspects of the national economy It is also designed in a manner which helps in framing policies for future activity The aim of this book is mainly to describe the anatomy of these three social accounting systems and compare their structures Some attention is also

given to a comparison of the systems in actual use by some industrially developed countries including the centralized economies The problem of integrating the three systems is also cursorily treated The student of economics and the economist in the service of industry private or public will obtain from this book a picture of the concepts and definitions used in social accounting the book also describes how each system is constructed and which economic study or analysis it can best serve Another valuable feature is the comparison the author makes of the national accounts system with the Russian National Accounts In this far reaching and complex work the author has brought together the fruits of his very extensive studies into the social accounting methods of many nations and he goes beyond the analysis of existing systems to suggest ways of tackling the problems of integrating the three main systems into one Dr Yanovsky is at present senior economist in the State Comptroller's Office in Israel He studied economics in the Universities of Chicago and Manchester where he obtained his doctorate at the Department of Economics and Social Studies in 1963 It was from a thesis he wrote while in Manchester that he drew the inspiration and much of the material for this book

Social Accounts and the Business Enterprise Sector of the National Economy F. Sewell Bray, 2013-09-26 Originally published in 1949 this monograph by esteemed accountant Frank Sewell Bray emphasizes the key virtues of precision uniformity and order which he believed to be essential to the correct practice of applied economics and accountancy Bray provides extensive sample statements to illustrate his points as well as a glossary of terms and concepts in use among both economists and accountants This book will be of value to anyone with an interest in the history and development of accountancy or in the overlap between accountancy and economics

Generative Mechanisms Transforming the Social Order Margaret S. Archer, 2015-02-18 This volume examines how generative mechanisms emerge in the social order and their consequences It does so in the light of finding answers to the general question posed in this book series Will Late Modernity be replaced by a social formation that could be called Morphogenic Society This volume clarifies what a generative mechanism is to achieve a better understanding of their social origins and to delineate in what way such mechanisms exert effects within a current social formation either stabilizing it or leading to changes potentially replacing it The book explores questions about conjuncture convergence and countervailing effects of morphogenetic mechanisms in order to assess their impact Simultaneously it looks at how products of positive feedback intertwine with the results of morphostatic negative feedback This process also requires clarification especially about the conditions under which morphostasis prevails over morphogenesis and vice versa It raises the issue as to whether their co-existence can be other than short-lived The volume addresses whether or not there also is a process of morpho-necrosis i.e. the ultimate demise of certain morphostatic mechanisms such that they cannot recover The book concludes that not only are generative mechanisms required to explain associations between variables involved in the replacement of Late Modernity by Morphogenic Society but they are also

robust enough to account for cases and times when such variables show no significant correlations

Theory and Social Structure takes sociology in a new direction. It examines key aspects of social structure by using a fresh understanding of emotions categories. Through that synthesis emerge new perspectives on rationality class structure social action conformity basic rights and social change. As well as giving an innovative view of social processes J M Barbalet's study also reveals unappreciated aspects of emotions by considering fear resentment vengefulness shame and confidence in the context of social structure. While much has been written on the social consequences of excessive or pathological emotions this book demonstrates the centrality of emotions to routine operations of social interaction. Dr Barbalet also re-evaluates the nature of social theory for once the importance of emotions to social processes becomes clear the intellectual constitution of sociology and therefore its history must be rethought.

Mental Health Homicide and Society David P Horton, 2019-09-19. A homicide committed by a mentally disordered person who is under the care of health service professionals is a shocking event. Otherwise known as a patient homicide these incidents are followed by an investigation into the care and treatment received by the perpetrator. These investigations are often regarded as a way to learn lessons establish accountability and provide catharsis to families and the public. The book argues however that patient homicide events and the circumstances in which they occur are communicated about within closed systems of life e.g. law medicine. These systems operate according to unique internal logics. The communications produced by these systems nevertheless resonate in society and enable a diverse and complex space of governance to emerge a space of governance in which universal understandings about patient homicides health care public safety and risk are unachievable. The Scottish Government initiated reform of their patient homicide investigation procedures in 2017 and plans to reform patient homicide investigations in England are slowly germinating. This original and compelling book is therefore a timely and important contribution. It concludes that health policy makers should re-evaluate their normative commitments to patient homicide risk reduction in a world of disharmony objection and resistance.
