**Social Identities** Rupert Brown, Dora Capozza, 2016-07-22 The concept of social identity occupies a central position in contemporary social psychology. *Social Identities: Motivational, Emotional, Cultural Influences* reports recent developments in the analysis of motivational and affective aspects of social identity processes. The book also examines the cross-cultural generality of Social Identity Theory explanations of intergroup competitiveness, which have strongly influenced international research in this area. People's social identities and self-evaluation are thought to be largely derived from group memberships; it is presumed that people are motivated to attain positivity in these identities by favouring the ingroup in intergroup comparisons. An increasing stream of research is being devoted to extending the applicability of social identity concepts to intergroup relations and related fields. The editors present here a collection of contributions from leading figures in social psychology which explore the state of the art in social identity theory. The most prominent motivational theories of identification are reported. Central themes concern motivations which lead individuals to join a group and identify with it, the role emotions have in favouring or hindering intergroup relations, the effect of emotions on intergroup behaviour, how people react to social identity threats. Shedding new light on important social problems like prejudice, bigotry, and intense conflicts around the world, this unique volume will be indispensable to students and researchers of social psychology, sociology, and cultural studies.

**Reducing Prejudice and Discrimination** Stuart Oskamp, 2013-05-13 Finding ways to reduce prejudice and discrimination is the central issue in attacking racism in our society. Yet this book is almost unique among scientific volumes in its focus on that goal. This important book combines critical analysis of theories about how to reduce prejudice and discrimination with cutting-edge empirical research conducted in real-world settings as well as in controlled laboratory situations. This book's outstanding contributors focus on a common set of questions about ways to reduce intergroup conflict, prejudice, and stereotyping. They summarize their own research as well as others', interpret the conclusions, and suggest implications concerning the practical methods that have been or could be used in programs aimed at reducing intergroup conflict. The chapters present solidly based critical analyses and research findings in clear, reader-friendly prose. This book evolved from the Sixteenth Annual Claremont Symposium on Applied Social Psychology. Each Symposium in the series concentrates on a single area in which social psychological knowledge is being applied to the resolution of a current social problem. Ideal for teachers, social workers, administrators, managers, and other social practitioners who are concerned about prejudice and discrimination, this book will also serve as a valuable foundation of knowledge in courses that examine this topic.
