Sweden analyzing their interaction with the international climate institutions of the United Nations with national governments and with currents in the global climate movement It documents how and why the movement evolved between the Copenhagen Summit of 2009 and the Paris Summit of 2015 altering its strategies and tactics while attracting new actors to the issue area Further it demonstrates how the development of global environmental networks has increased contact between environmental movements in the Global North and those from the Global South resulting in the establishment of climate justice as a political cause and unifying frame for global climate activism
