

Introduction to Health and social policy

Homework

In my opinion, welfare states still protect cradle to the grave because of the support that they provide, for example, people can claim benefits if they need extra support for any number of reasons, and support with education is provided by state schools for those who cannot afford private schools or scholarships/bursaries for those who cannot afford private schools. Although there are many benefits to the welfare state, there are also some disadvantages. For example, people who bought council housing were unable to afford the additional costs associated with maintaining the house, and the support that was provided had some disadvantages as well.

Beveridge's five giants have been defeated to a certain degree due to being supported with housing, finding a good education, finding and gaining suitable employment along with increasing health and reducing poverty. However, there are still issues in society that are preventing the five giants from being defeated further.

The areas I believe that has made the most progress has been education and health due to policies being implemented that have brought improvements to health and decreased illness or made the public more aware of diseases and illnesses, another area is education because of policies allowing children of all background and various skills to have the education to help progress them further. But areas where I think have made the least progress are poverty and housing especially now as the cost of living crisis has impacted people's ability to afford to house or prevent poverty.

Debating universalism vs selectivity

Child benefit should be selective due to not everyone needs to seek or claim benefit such a well-off person doesn't necessarily need to claim child benefit. Another reason could be the resources could be wasted or people could fall through the cracks if universalism is applied to child benefit.

Social Policy Fiona Williams, 1989. This major new introductory textbook in social policy breaks new ground in arguing for the centrality of race, gender and class in welfare theory and practice. The book describes and evaluates the major theoretical perspectives on welfare as well as the different strands of feminism and work on racism which are relevant to social policy. The author develops a new analytical framework for the study of the welfare state which takes account of factors deriving from capitalism, patriarchy, racism and the international division of labour. This framework is then used to re-examine the major developments in the history of the welfare state in Britain from the nineteenth century to the so-called crisis of the welfare state today.
