**The Role of International Investment Agreements in Fostering Sustainable Development** Wolfgang Alschner, 2013 This paper provides a brief overview of recent UNCTAD research on the nexus between international investment treaties and sustainable development After sketching the historic evolution and current trends in IIA treaty practice it explores the

linkages between IIAs and three areas of public policy making that have been at the centre of UNCTAD's research and policy analysis with respect to IIAs and sustainable development. These include 1 combating climate change 2 integrating investment and industrial policy and 3 promoting responsible corporate behaviour. The paper concludes on the need for more inter-State cooperation to address the various challenges facing the IIA regime today and to enhance its sustainability dimension. In this context UNCTAD's recently released Investment Policy Framework for Sustainable Development (IPFS) can provide helpful guidance for the formulation of a new generation of more sustainable investment policy making.

*International Investment Arrangements*, 2006. The past few years saw a proliferation of international investment agreements (IIAs) at the bilateral, regional and interregional levels, presenting new challenges for policymakers. As global economic integration becomes ever deeper, managing the impacts of integration on the domestic economy becomes more complex and the challenges greater. This paper provides an overview of some of the issues that arise as countries seek to ensure policy coherence in the face of a complex network of overlapping IIA provisions. Publisher's description: [Shifting Paradigms in International Investment Law](#) Steffen Hindelang, Markus Krajewski, 2016-01-21. International investment law is in transition. Whereas the prevailing mindset has always been the protection of the economic interests of individual investors, new developments in international investment law have brought about a paradigm shift. There is now more than ever before an interest in a more inclusive, transparent and public regime. *Shifting Paradigms in International Investment Law* addresses these changes against the background of the UNCTAD framework to reform investment treaties. The book analyses how the investment treaty regime has changed and how it ought to be changing to reconcile private property interests and the state's duty to regulate in the public interest. In doing so, the volume tracks attempts in international investment law to recalibrate itself towards a more balanced, less isolated and increasingly diversified regime. The individual chapters of this edited volume address the contents of investment agreements, the system of dispute settlement, the interrelation of investment agreements with other areas of public international law, constitutional questions and new regional perspectives from Europe, South Africa, the Pacific Rim Region and Latin America. Together, they provide an invaluable resource for scholars, practitioners and policymakers. The individual chapters of this edited volume address the contents of investment agreements, the system of dispute settlement, the interrelation of investment agreements with other areas of public international law, constitutional questions and new regional perspectives from Europe, South Africa, the Pacific Rim Region and Latin America. Together, they provide an invaluable resource for scholars, practitioners and policymakers. **Fair and Equitable Treatment**, 1999.

*Investor-state Disputes Arising from Investment Treaties*, 2005. The settlement of disputes between investors and the states in which they operate is a key aspect of the system of investment protection established in international investment agreements. Thus, the majority of international investment agreements contain provisions on investor-state dispute settlement. These provisions have been increasingly used in recent years and this has resulted in more arbitral awards. This paper takes

stock of and analyzes the nature and implications of this trend In particular it considers not only the statistical aspects of this development but also the effects of arbitral decisions on the evolution of dispute settlement procedures under international investment agreements and on the interpretation and further refinement of the substantive standards of protection that they contain Publisher s description      **Integrating Sustainable Development Into International Investment Agreements**

**Stabilization Clauses in International Investment Law** Jola Gjuzi, 2018-12-05 This book analyzes the tension between the host state s commitment to provide regulatory stability for foreign investors which is a tool for attracting FDI and generating economic growth and its evolving non economic commitments towards its citizens with regard to environmental protection and social welfare The main thesis is that the stabilization clause regulatory power antinomy as it appears in many cases contradicts the content and rationale of sustainable development a concept that is increasingly prevalent in national and international law and which aims at the integration and balancing of economic environmental and social development To reconcile this antinomy at the decision making and dispute settlement levels the book employs a constructive sustainable development approach which is based on the integration and reconciliation imperatives of the concept of sustainable development as well as on the application of principles of law such as non discrimination public purpose due process proportionality and more generally good governance and rule of law It subsequently re conceptualizes stabilization clauses in terms of their design ex ante and interpretation ex post yielding stability to the benefit of foreign investors while also mitigating their negative effects on the host state s power to regulate
