*Practice Informed Research Methods for Social Workers* Teresa Morris, 2014-11-21 This book describes and discusses research methods for four alternative paradigms These methodologies are organized according to the stages of a generalist model of social work practice In my first book on Social Work Research Methods Morris 2006 I introduced the idea that social workers can carry out research in a more liberated fashion than is usually outlined in most research methods text books I gave a philosophical theoretical historical and practical foundation for implementing research from four alternative perspectives positivism post positivism critical theory and constructivism As well as introducing these paradigms I integrated research methodologies with social work practice by translating the steps of the generalist social work practice model engagement assessment planning implementation evaluation termination and follow up into the research process research focus design data collection data analysis data interpretation and communication and dissemination of findings I divided that book into four parts according to each paradigm with a fifth part that addressed cross cutting issues such as ethics diversity politics and technology This book updates and reorganizes these ideas and methods so that the flow of the discussion more closely parallels the flow of the research process Instead of being organized according to the paradigms it is organized according to the stages of the research process Also to assist with instruction on this new organization there are additional resources that contain power point slides full texts of example student studies using these approaches test questions and other supplementary materials These can be accessed by contacting me at [tmorris@csusb.edu](mailto:tmorris@csusb.edu) I have made these changes because after using my first book for a few years I realized that starting with positivism and ending with constructivism has left students who are keen to learn about critical theory and constructivism cooling their heels for half of the course Now when I integrate the four paradigms throughout the course I offer a continual comparison of those approaches as we learn about each stage of generalist research methods Having tried this with drafts of this book I can honestly say that classroom discussion has become more lively and demanding

refined to optimize its efficacy Despite its emphasis on active engagement learner centered education has also been subject to critique how can its limitations be systematically addressed to enhance instructional effectiveness Furthermore what constitutes transformative education and how can it be meaningfully integrated into classroom practice These questions are of paramount significance to educators parents students educational administrators and curriculum developers This book endeavors to explore these critical themes with the aspiration that it will provide valuable insights to its readers however modest the impact may be

[Lifting Our Voices](#) Joyce Octavia Beckett, 2008. *Lifting Our Voices* is the only book to explore the dual roles of professional social workers who are also family caregivers and the only collection on caregiving in which the majority of contributors are African American. After discussing the relevant literature, *Lifting Our Voices* vividly and sensitively presents the caregiving experiences of ten professional social workers. Using professional and theoretical knowledge and skills, each contributor draws implications for various levels of social work and human service interventions. These poignant descriptions and analyses recount both the frustrations and barriers of negotiating social service agencies and other institutions and the joys and triumphs of family caregiving. *Lifting Our Voices* frankly discusses how a professional education either prepares or fails to equip an individual with the skills for successful intervention on behalf of a loved one. Contributors hail from rich and varied backgrounds, revealing the importance of age, ethnicity, gender, marital status, and gerontological expertise in the practice of family caregiving. These essays explore situations rarely reported on in the literature, such as caregivers and care recipients who represent the lifespan from preschool to retirement. *Lifting Our Voices* graphically describes types of caregiving that are seldom discussed, including simultaneous caregiving to multiple family members and reciprocal and sequential caregiving, thus broadening and refining the very concepts of caregiving and family.
