Socialist Economics Alec Nove, Domenico Mario Nuti, 1974 Socialist Economics Alec Nove, 1976 *The Contradictions of "Real Socialism"* Michael A. Lebowitz, 2012-08-01 What was real socialism the term which originated in twentieth century socialist societies for the purpose of distinguishing them from abstract theoretical socialism In this volume Michael A Lebowitz considers the nature tendencies and contradictions of those societies Beginning with the constant presence of shortages within real socialism Lebowitz searches for the inner relations which generate these patterns He finds these in particular in what he calls vanguard relations of production a relation which takes the apparent form of a social contract where workers obtain benefits not available to their counterparts in capitalism but lack the power to decide within the workplace and society While these societies were able to claim major achievements in areas from health care to education to popular culture the separation of thinking and doing prevented workers from developing their capacities as fully developed human beings The relationship within real socialism between the vanguard as conductor and a conducted working class however did not only lead to the deformation of workers and those elements necessary for the building of socialism it also created the conditions in which enterprise managers emerged as an incipient capitalist class which was an immediate source of the crises of real socialism As he argued in *The Socialist Alternative Real Human Development* Lebowitz stresses the necessity to go beyond the hierarchy inherent in the relation of conductor and conducted and beyond the vanguard Marxism which supports this to create the conditions in which people can transform themselves through their conscious cooperation and practice i e a society of free and associated producers

Economies in Transition Allan E. Young, Ivan Teodorovi?, Peter Koveos, 2002 To date the record of economic transition has decidedly been mixed The worldwide political climate is still in favor of economic reform and the process continues to have considerable momentum On the other hand this process now faces a number of formidable obstacles There appears to be general agreement that in many countries the promise of a better standard of living which economic transition offers to the mass of the citizenry has failed to produce the rapid and dramatic results hoped for There is an increasing conflict of interest between multinational firms and the national business community Moreover many transition economies have experienced a slowing of economic growth in real terms and social services have been severely cut This book deals with the development of those forces that have played a major role in the successes and failures of economic transition Its distinctive feature is that it does this from the perspective of economic political and social analysis taking into account both theoretical constructs and economic realities for those countries which have attempted the grand experiment with economic transition

and analysis of capitalist and socialist economic systems is examined How they fed into his conceptualization of hard and soft budget constraints and complemented his work on economic theory in particular debates around Walrasian and Marshallian equilibrium theory is also discussed This book offers insight into the work of Janos Kornai and his impact upon economics It will be of relevant to students and researchers interested in the history of economic thought and comparative economics

Chinese Business Under Socialism Dorothy J. Solinger, 1987 **Socialist Economics** Alec Nove, D. M. Nuti, 1972 *Central Europe* Lonnie Johnson, 1996-10-31 Throughout the Cold War era the Iron Curtain divided Central Europe into a Communist East and a democratic West and we grew accustomed to looking at this part of the world in bipolar ideological terms Yet many people living on both sides of the Iron Curtain considered themselves Central Europeans and the idea of Central Europe was one of the driving forces behind the revolutionary year of 1989 as well as the deterioration of Yugoslavia and its ensuing wars Central Europe provides a broad overview and comparative analysis of key events in a historical region that encompasses contemporary Germany Poland the Czech Republic Slovakia Austria Hungary Slovenia and Croatia Starting with the initial conversion of the pagan peoples of the region to Christianity around 1000 A D and concluding with the revolutions of 1989 and the problems of post Communist states today it illuminates the distinctive nature and peculiarities of the historical development of this region as a cohesive whole Lonnie R Johnson introduces readers to Central Europe s heritage of diversity the interplay of its cultures and the origins of its malicious ethnic and national conflicts History in Central Europe he shows has been epic and tragic Throughout the ages small nations struggled valiantly against a series of imperial powers Ottoman Turkey Habsburg Austria imperial Germany czarist Russia Nazi Germany and the Soviet Union and they lost regularly Johnson s account is present minded in the best sense in describing actual historical events he illustrates the ways they have been remembered and how they contribute to the national assumptions that still drive European politics today Indeed the constant interplay of reality and myth the processes of myth making and remembrance animates much of this history Since the fall of the Iron Curtain in 1989 the unanticipated problems of transforming post Communist states into democracies with market economies the wars in the former Yugoslavia and the challenges of European integration have all made Central Europe the most dynamic and troubled region in Europe In Central Europe Johnson combines a vivid and panoramic narrative of events a nuanced analysis of social economic and political developments and a thoughtful portrait of those myths and memories that have lives of their own and consequences for all of Europe
