Sociology of Mystic Practices Dann Wigner, 2018-06-08 This book investigates the process of spiritual borrowing between the emergent church EC and the Christian mystical tradition From its inception the EC has displayed interest in mystic practices but the exact nature of this interest or how these practices are appropriated and reinterpreted in the EC context has not been researched My research shows that the emergent church is appropriating Christian mystic practices by investing these practices with their own theological content The practices themselves are changed to fit in their new context showing that EC belief shapes EC behavior My study adds a new case study perspective to the sociological examination of the process of spiritual borrowing especially through close inspection of how a spiritual practice changes to fit a new theological context Additionally my book contributes to the study of the complex relationship between belief and behavior Assessment: Social

Practice and Social Product Ann Filer, 2002-11 In Assessment the writers take the reader beyond the obvious function of assessment and focus upon the roles it performs in the social structuring of society **Diverse Histories of American**

Sociology Anthony Blasi, 2005-06-01 This volume presents views of American sociology from minority groups and important intellectual movements that did not merge into the mainstream Coinciding with the centenary of the American Sociological Association it provides little known background information to the development of the field A first section highlights tensions between impartial scientific sociology and scientific social reform A second section uncovers the experiences of female African American and Latino pioneers in the field as well as a sociologist from a religious minority A third section traces the organizational history of the field including gendered racial regional and outsider perspectives A final section focuses on several neglected trajectories With this volume American sociology can be seen in its full context The Colonial Origins of Modern Social Thought George Steinmetz, 2025-02-25 A new history of French social thought that connects postwar sociology to colonialism and empire In this provocative and original retelling of the history of French social thought George Steinmetz places the history and development of modern French sociology in the context of the French empire after World War II

Connecting the rise of all the social sciences with efforts by France and other imperial powers to consolidate control over their crisis ridden colonies Steinmetz argues that colonial research represented a crucial core of the renascent academic discipline of sociology especially between the late 1930s and the 1960s Sociologists who became favored partners of colonial governments were asked to apply their expertise to such social problems as detribalization urbanization poverty and labor migration This colonial orientation permeated all the major subfields of sociological research Steinmetz contends and is at the center of the work of four influential scholars Raymond Aron Jacques Berque Georges Balandier and Pierre Bourdieu In retelling this history Steinmetz develops and deploys a new methodological approach that combines attention to broadly contextual factors dynamics within the intellectual development of the social sciences and sociology in particular and close readings of sociological texts He moves gradually toward the postwar sociologists of colonialism and their writings beginning with the most macroscopic contexts which included the postwar reoccupation of the French empire and the turn to developmentalist policies and the resulting demand for new forms of social scientific expertise After exploring the colonial engagement of researchers in sociology and neighboring fields before and after 1945 he turns to detailed examinations of the work of Aron who created a sociology of empires Berque the leading historical sociologist of North Africa Balandier the founder of French Africanist sociology and Bourdieu whose renowned theoretical concepts were forged in war torn late colonial Algeria

Sociology for Social Work Lena Dominelli,1997-11-11 This major text addresses the relevance of sociological concepts to social work practice arguing that lack of understanding of the ways in which social work fits into society's structures and is informed by its relationship with these can lead to impoverished social work practice Written from an anti racist feminist perspective it both argues for social workers to engage in empowering forms of practice and provides students practitioners and educators with a new paradigm to draw on

How Scientific Practices Matter Joseph Rouse, 2002 How can we understand the world as a whole instead of separate natural and human realms Joseph T Rouse proposes an approach to this classic problem based on radical new conceptions of both philosophical naturalism and scientific practice Rouse begins with a detailed critique of modern thought on naturalism from Neurath and Heidegger to Charles Taylor Thomas Kuhn and W V O Quine He identifies two constraints central to a philosophically robust naturalism it must impose no arbitrarily philosophical restrictions on science and it must shun even the most subtle appeals to mysterious or supernatural forces Thus a naturalistic approach requires philosophers to show that their preferred conception of nature is what scientific inquiry discloses and that their conception of scientific understanding is itself intelligible as part of the natural world Finally Rouse draws on feminist science studies and other recent work on causality and discourse to

demonstrate the crucial role that closer attention to scientific practice can play in reclaiming naturalism A bold and ambitious book *How Scientific Practices Matter* seeks to provide a viable yet nontraditional defense of a naturalistic conception of philosophy and science Its daring proposals will spark much discussion and debate among philosophers historians and sociologists of science
