Lane,David Lane,2019-06-26 Before beginning the study of the social system I have chosen to call state socialism it is necessary to define the term and to describe the societies to which it is held to apply A society may be defined as a behavioural system having three components a distinct set of central or dominant value and beliefs a number of social institutions and patterns of interactions between individuals and institutions What then are the distinguishing features of state socialism The dominant values are those ofMarxism Leninism andthepeculiar institutions of the system stem from the state owned means of production which determine man s relationship to property The values laid down in the charter of the society are those of socialism that is a system of beliefs focused on the ultimate perfectibility of man on the determining influence of class forces operating through the laws of historical and dialectical materialism In state socialist societies the dominant institution is the Communist Party which is considered to lead the working class and provides an authoritative interpretation of the laws of historical development which in turn legitimate the Party s own political power The appellation state focuses on the central role played by government and Party institutions in the process of these societies not only do ownership and control of the means of production legally reside with the state but it has the authority to mobilise the population to achieve the goals defined in the official charter In the patterns of interactions between institutions the state government and ruling party plays a dominant role Let us now turn from analytical concepts to consider some historical generalisations The Annals of the American Academy of Political and Social Science ,1912 *Russian Sociology* Julius Friedrich Hecker,1916 Palgrave's Dictionary

of Political Economy Robert Harry Inglis Palgrave,1926   *The Reconstruction of Economic Theory* Simon Nelson Patten,1912   **Dictionary of Political Economy** Robert Harry Inglis Palgrave,1901   The Annals of the American Academy of Political and Social Science American Academy of Political and Social Science,1912   **The Yale Review** George Park Fisher,George Burton Adams,Henry Walcott Farnam,Arthur Twining Hadley,John Christopher Schwab,William Fremont Blackman,Edward Gaylord Bourne,Irving Fisher,Henry Crosby Emery,Wilbur Lucius Cross,1909   **Main Currents in Sociological Thought: Volume Two** Raymond Aron,2025-05-06 The second volume of the landmark study examining the work of sociology s defining thinkers from the turn of the nineteenth century to the interwar period Main Currents in Sociological Thought remains a foundational synthesis in the field In this second and final volume of his classic survey Raymond Aron explores the work of three figures who profoundly shaped sociology as it entered the twentieth century Durkheim who continued Comte s quest for a science of society and a scientific validation of morality Pareto the Italian neo Machiavellian who emphasized the elitist character of all societies and Weber the German sociologist who reflected critically on the prospects for human freedom in an age of disenchantment Bringing together penetrating intellectual portraits of these great thinkers and close readings of their most consequential texts Main Currents in Sociological Thought highlights the historical and intellectual context within which each man wrote and draws out their works enduring insights and influence in the field today
