The Communicator:

The Communicator's Pocketbook Sean Misteil, 2010 Being an effective communicator is hard work but it is the single most important part of a manager's role. Many of us think we are good at it; it's all those people who don't listen who are the problem. *The Communicator's Pocketbook* covers the dynamics of communication, how to be effective, likely barriers, styles of communication, and technology at work. The book concludes with a series of checklists that will enable you to take stock of your communications skills and shortcomings and to put these into context at both an organisational level and a group or team level.

The Communicator's Guide to Media Law and Ethics Mark Pearson, 2023-11-23 This book offers an introduction to the key legal and ethical topics confronting Australian journalists and strategic communicators both at home and internationally and offers a suite of reflective techniques for navigating them. It starts by positioning morals, ethics, and the law in their historical and philosophical frameworks by tracing the evolution of free expression and professional media ethics. Media law and ethics are then contextualized in their modern international human rights framework. Readers are equipped with a skill set for reflecting on the law and ethics of professional media dilemmas including mindful reflection, the Potter Box, journaling, concept mapping, and discussion. Such approaches are then applied to key topic areas including free expression, reputation, confidentiality, privacy, justice, intellectual property, national security, discrimination, and harassment and conflicted interests. Each is examined in terms of its philosophical underpinnings, relationship to human rights, professional ethical context, international examples, legal principles, key Australian laws, legal cases, and strategies for applying reflective practice techniques. It concludes on a confident note imploring communicators to engage in constructive and mindful strategic communication with the authority and confidence that results from a working knowledge of media law and ethics. This handbook is for professional communicators and students in all fields but particularly in journalism, public relations, corporate communication, media relations, and marketing.

Interreligious Learning Carl Sterkens, 2001 The increasing plurality of religions and world views in western society has major implications for religious communication in both public and private settings. This study is an important step in an exploration of the consequences of this religious plurality for religious education in primary education. The chief concern of this study is the following question: To what extent is a pedagogic model in which pupils are encouraged to participate in an interreligious dialogue adequate for coping with this religious plurality? To address this question, the author discusses the following research questions: what are the cognitive, the affective, and the attitudinal effects of the interreligious model for religious education and can this model be legitimised? These questions are considered in the context of a discussion of the meaning of religion and an elaboration of the aim of religious education within the context of a secularized and multicultural society.
