Media, 2022-03-27T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The Raw Cat is your cat's ancestral twin and it lives inside her It is the source of her constant alertness and it drives her to hunt kill and eat Everything about your cat from her territorial identification to her nutritional requirements is linked back to her Raw Cat 2 The first evidence of cat-ness occurred when carnivores evolved from smaller mammals around 42 million years ago They are defined by the structure of their teeth which are designed to shear meat rather than grind plant matter 3 The process of cat evolution is marked by the formation of new species when genetic changes occur over time and cause populations to mutate These changes often happen when a group of animals becomes isolated from other members of the same species 4 There is not as clear a distinction between the Old and New World cats as there is between other animals Old World cats include domestic cats wild cats fishing cats lynx bobcat caracal serval and cheetah New World cats include ocelots Geoffroy's cat and pumas *Bibliography of Agriculture with Subject Index*, 1993-11 *Metric Spaces of Non-Positive Curvature* Martin R. Bridson, André Häfliger, 2013-03-09 The purpose of this book is to describe the global properties of complete simply connected spaces that are non-positively curved in the sense of A D Alexandrov and to examine the structure of groups that act properly on such spaces by isometries Thus the central objects of study are metric spaces in which every pair of points can be joined by an arc isometric to a compact interval of the real line and in which every triangle satisfies the CAT(0) inequality This inequality encapsulates the concept of non-positive curvature in Riemannian geometry and

allows one to reflect the same concept faithfully in a much wider setting that of geodesic metric spaces Because the CAT 0 condition captures the essence of non positive curvature so well spaces that satisfy this condition display many of the elegant features inherent in the geometry of non positively curved manifolds There is therefore a great deal to be said about the global structure of CAT 0 spaces and also about the structure of groups that act on them by isometries such is the theme of this book 1 The origins of our study lie in the fundamental work of A D Alexandrov
