[China's Aerospace Strategy](#) ,2013-02-15 China has emerged as a major regional power and has clear aspirations to be a global power in the not too distant future Comprehensive military modernisation programs sustained economic scientific and technological developments have substantially elevated China s international profile For the past three decades China has been modernising its strategic weaponry and enhancing the capabilities of its nuclear warheads It has also been developing new and complex military platforms that would be of great value to joint operations warfare The decade from 2011 through 2020 will prove critical to the PLA as it attempts to integrate many new and complex platforms and to adopt modern operational concepts including network centric warfare China s air force is in the midst of a transformation A decade ago it was an antiquated service equipped almost exclusively with weapons based on 1950s era Soviet designs and operated by personnel with questionable training according to outdated employment concepts Today the PLAAF appears to be on its way to becoming a modern highly capable air force for the 21st century The PLA Air Force has continued expanding its inventory of long range advanced SAM systems and now possesses one of the largest such forces in the world The January 2011 flight test of China s next generation fighter prototype the J 20 highlights China s ambition to produce a fighter aircraft that incorporates stealth attributes advanced avionics and super cruise capable engines over the next several years China is upgrading its B 6 bomber fleet with a new longer range variant that will be armed with a new long range cruise missile China s aviation industry is developing several types of airborne early warning and control system AWACS aircraft These include the KJ 200 based on the Y 8 airframe for AWACS as well as intelligence collection and maritime surveillance and the KJ 2000 based on a modified Russian IL 76 airframe China can decisively defeat India in any

nuclear confrontation but is currently unable to match the IAF in any conventional conflict specifically along the border region of the Himalayas Also the IAF has greater experience than PLAAF in actual combat operations with its many conflicts India is gradually building powerful military capabilities in tune with its expanding geopolitical interests even as the eastern and western fronts are being strengthened to deter the twin Pakistan China threat IAF is on the path to transform into a true aerospace power with the capability to rapidly deploy and operate at great distances As for the two front challenge apart from progressively basing Sukhoi 30MKI fighters and missile squadrons in the two theatres the plan also includes upgrading the airfields and advanced landing grounds in the sectors in order to give both defensive and offensive options It is important for India to realise the relevance of Chinese achievements in space technologies and to critically view and analyse Chinese achievements in the area of manned space missions In order to achieve further success in the space arena developments in cryogenic technology are important for India These should be pursued in order to develop the capability of launching 4 5 ton satellites which will help in achieving a greater commercial edge Programmes like moon and mars missions using robotic technologies are also important in order to know more about the nature of resources especially minerals available on these bodies and undertaking their mining It is also important to work towards launching satellites for India s armed forces which will help gain an advantage over adversaries The book is an attempt to analyse the strategic importance of rising economic political and military stature of China with a view to understand its regional and global implications in a new world order As a rational actor in a chaotic world China will defend its security interests at all costs Besides undertaking a comprehensive modernisation of its armed forces China is developing a series of offensive space capabilities while advocating the peaceful use of outer space The book will be of immense value not only to the readers of the countries in the immediate neighbourhood of China but to the strategic community across the globe since rise of China and other major Asian players including India will shape the strategic international environment in the decades to come during this century It is hoped that the book will contribute to the understanding of the growing importance of integration of air and space and the fact that aerospace has truly become the new theatre of war and thereby establishing a new milestone in mankind s history of warfare The unifying space dimension will remain the single most important source for information and communication which can be used in multiple forms Hence China s aerospace strategy and its implications for India assume greater military importance

*Introduction to Military History* Robert Greenhalgh Albion,1929      The Evolution Of Military Strategy Nicky

Huys,2024-04-13 The Evolution Of Military Strategy offers a comprehensive exploration of the evolution of warfare tactics and strategic thinking from ancient times to the present day This book delves into the pivotal battles influential military leaders and the development of strategic principles that have shaped the course of history Readers will gain insights into the tactics employed by renowned military figures and the impact of technological advancements on the art of war With a focus on the intersection of military political and cultural forces this book provides a compelling narrative of the pivotal moments

that have shaped the world's military strategies. Whether you are a history enthusiast, a military buff, or a strategic thinker, *The Evolution Of Military Strategy* offers a captivating journey through the annals of warfare. **The Art and Practice of Military Strategy** George Edward Thibault, 1984. *Ethics and Military Strategy in the 21st Century* George Lucas, Jr., 2019-07-10. This book examines the importance of military ethics in the formulation and conduct of contemporary military strategy. Clausewitz's original analysis of war relegated ethics to the side lines in favor of political realism, interpreting the proper use of military power solely to further the political goals of the state, whatever those may be. This book demonstrates how such single-minded focus no longer suffices to secure the interest of states for whom the nature of warfare has evolved to favor strategies that hold combatants themselves to the highest moral and professional standards in their conduct of hostilities. Waging war has thus been transformed in a manner that moves beyond Clausewitz's original conception, rendering political success wholly dependent upon the cultivation and exercise of discerning moral judgment by strategists and combatants in the field. This book utilizes a number of perspectives and case studies to demonstrate how ethics now plays a central role in strategy in modern armed conflict. This book will be of much interest to students of just war ethics, military strategy, and international relations. **Ethics, Law and Military Operations** David Whetham, 2010-09-27. Public anger at perceived ethical and legal failures in recent wars has reinforced the importance of understanding military ethics. *Ethics, Law and Military Operations* is one of the first texts to examine both the ethical and the legal considerations of contemporary military conflict. It adopts a practical approach to explore the ways in which legal and normative issues combine to affect the entire spectrum of military operations, from high intensity conflict to peacekeeping activities and the provision of humanitarian aid. With an operational perspective in mind, this text delivers accessible frameworks for evaluating and applying fundamental legal and ethical concepts. Written by an international team of military practitioners and academics, this book provides interdisciplinary insights into the major issues facing military decision makers. The first half of the book explores the ethical and legal underpinnings of warfare. Later chapters use case studies to examine specific issues in the contemporary operating environment. *Military Strategy* Vasilii Danilovich Sokolovskii, 1972. **The American Culture of War** Adrian R. Lewis, 2006-12-21. *The American Culture of War* presents a sweeping critical examination of every major American war since 1941. Timely, incisive, and comprehensive, it is a unique and invaluable survey of over sixty years of American military history. *Russia and Armed Persuasion* Stephen J. Cimbala, 2001. In *Russia and Armed Persuasion*, Stephen J. Cimbala argues that Russia's war planners and political leaders must make painful adjustments in their thinking about the relationship between military art and policy in the twenty-first century. Russia must master the use of force for persuasion, not just destruction. As the author shows, military persuasion requires that Russian leaders master the politico-military complexity of crisis management, deterrence, and arms control, and the limitation of ends and means in war. Russia now has scarce resources to devote to defense and can no longer afford the stick-only diplomacy and strategy that have

characterized some of its recent past Russian and Soviet military thinking historically emphasized the blunderbuss and total war overwhelming mass firepower and conflicts of annihilation or prolonged attrition However historical experience also forced Russia and the Soviet Union to come to grips with crisis management and with limited aims and means in the conduct of war On the one hand Russia failed the test of military persuasion in its management of the July 1914 crisis that plunged Europe into World War I On the other hand the Soviet Union did adjust to the requirements of the nuclear age for crisis management deterrence and limited war Using this mixed record of Russian and Soviet success and failure in twentieth century experience Cimbala argues that Russia can and must improve in the twenty first century According to the author the first decades of this century will pose at least three immediate challenges to Russia s military persuasion Russia must continue to pursue strategic nuclear arms control and arms reductions with the United States and avoid re starting the Cold War by means of an ill considered race in missile defenses Second Russia must maintain a surer grip on the military information revolution especially as it pertains to the management of Russia s nuclear deterrent Third Russia must develop forces that are more flexible in small wars and peace operations its recent experiences in Chechnya show that it has a long way to go in using economy of force as a military persuader Cimbala s original analysis demonstrates the similar features in apparently dissimilar or even opposite events and processes For example he shows how the problem of military persuasion applies equally to the challenge of managing a nuclear crisis and the problem of low intensity war In each case the dilemma is calibrating the military means to the political ends Controversially the author argues against both military and academic traditionalists contending that the complexity of the force policy relationship in the next century will reward the subtle users of military power and that others will be subject to a Gulliver effect of diminishing returns

**The Nature of War in the Information Age** David J. Lonsdale, 2004-06 Much of today s Revolution in Military Affairs RMA literature subscribes to the idea that the information age will witness a transformation in the very nature of war In this book David Lonsdale puts that notion to the test
