Emergence of EU Contract Law Lucinda Miller,2011-09-22 The emergence of a pan European contract law is one of the most significant legal developments in Europe today The Emergence of EU Contract Law Exploring Europeanization examines the origins of the discipline and its subsequent evolution It brings the discussion up to date with full analysis of the debate on the Common Frame of Reference and the future that this ambiguous instrument may have in the contemporary European legal framework One of the central themes of the book is exploration of the multi level open architecture of the EU legal order and the implications of that architecture for the EU s private law programme The analysis demonstrates that the key to understanding European contract law in the 21st century lies in adopting a perspective and mechanisms suitable for a legal order populated by multiple sources of private law Legal pluralism is offered as a theoretical construct with the capacity to shape the future of European private law shifting the analytical spotlight beyond the traditional centralized legislative means of regulation In so doing softer mechanisms are introduced for the governance of contract law mechanisms that enable coordination between the different sites at which contract law operates This reorientation in thinking about European contract law indeed about Europeanization itself enables the inevitable diversity and pluralism that is a feature of multi level Europe to be captured within a framework that maximizes the opportunities for mutual learning and exchange across private law sites Human Rights in the Market Place Christopher Harding,Uta Kohl,2016-05-13 The ideology of human rights protection has gained considerable momentum during the second half of the twentieth century at both national and international level and appears to be an effective lever for bringing about legal change This book analyzes this strategy in economic and commercial policy and considers the transportation of the public law discourse of basic human rights protection into the commercial law context of economic policy business activity and corporate behaviour The volume will prove indispensable for anyone interested in human rights international law and business and commercial law

Producers and Consumers in EU E-Commerce Law John Dickie,2005-07-24 Producers and Consumers in EU E Commerce Law argues that the European Union is failing adequately to protect consumers critical interests in the area of e commerce The book compares the Union s close protection of producers critical interests in e commerce considered in terms of authorship and of domain identity with its faltering steps towards protection of consumers corresponding interests considered in terms of fair trading privacy and on behalf of children morality The book assesses the threats posed to those interests the extent to which self help can and does neutralise those threats and as regards any gaps left the extent to which the Union has stepped into the breach The argument is important given that surveys show low levels of consumer confidence in European cross border e commerce a motor of integration par excellence *EU Consumer Rights Directive* Great Britain:

Parliament: House of Lords: European Union Committee,2009-07-15 Evidence taken before Sub committee G Social Policy and Consumer Affairs **Varieties of European Economic Law and Regulation** Kai Purnhagen,Peter Rott,2014-07-16

This is the first book to comprehensively analyze the work of Hans Micklitz one of the leading scholars in the field of EU economic law It brings together analysts academic friends and critics of Hans Micklitz and results in a unique collection of essays that evaluate his work on European Economic Law and Regulation The contributions discuss a wide range of Micklitz work from his theoretical work on private law beyond party autonomy with a special focus on its regulatory function to the illustration of how his work has built the basis for current solutions such as used in solving the financial crisis The book is divided into sections covering foundations of private law regulatory law competition and intellectual property law product safety law consumer contract law and the enforcement of law This book clearly shows the enormous impact of Hans Micklitz work on the EU legal system in both scholarship and practice **European Fair Trading Law** Geraint Howells,Hans-W.

Micklitz,Thomas Wilhelmsson,2016-04-22 The Unfair Commercial Practices Directive is the most important directive in the field of trade practices to have emerged from the EC but it builds upon European activity which has sought to regulate trade practices on both a sectoral and horizontal level It is an umbrella provision which uses general clauses to protect consumers How effective this approach is and how it relates the existing *acquis* are fundamental issues for debate This work provides a critical appraisal of the Unfair Commercial Practices Directive linking discussion of it to general debates about how fair trading should be regulated It explains how the Directive fits into the existing *acquis* It also examines national traditions where these are necessary to explain the European approach as in the case of general clauses The book will be a valuable tool for any student of consumer law seeking to understand the thinking behind the directive and how it will affect national laws It will also influence policy makers by suggesting how the directive should be interpreted and what policy lies behind its formulation Businesses and their advisers will use the book as a means of understanding the new regulatory climate post the directive **Information Obligations and Disinformation of Consumers** Gert Straetmans,2019-09-05 This book focuses

on recent developments in consumer law specifically addressing mandatory disclosures and the topical problem of information overload It provides a comparative analysis based on national reports from countries with common law and civil law traditions in Asia America and Europe and presents the reports in the form of chapters that have been drafted on the basis of a questionnaire and which use the same structure as the questionnaire to allow them to be easily compared The book starts with an analysis of the basic assumptions underlying the current consumer protection models and examines whether and how consumer models adapt to the new market conditions The second part addresses the information obligations themselves first highlighting the differences in the reported countries before narrowing the analysis down to countries with a general pre contractual information duty particularly the transparency requirements that often come with such a duty The next part examines recent developments in the law on food labelling commercial practices and unfair contract terms in order

to identify whether similar traits can be found in European and non European jurisdictions The fourth part of the book focuses on specific information obligations in the financial services and e commerce sectors discussing the fact that legislators are experimenting with different forms of summary disclosures in these sectors The final part provides a critical appraisal of the recent developments in consumer information obligations addressing the question of whether the multiple criticisms from behavioural sciences necessitate abandonment or refinement of current consumer information models in favour of new more adequate forms of consumer protection and providing suggestions

The Involvement of EU Law in Private Law Relationships Dorota Leczykiewicz, Stephen Weatherill, 2013-03-12 The involvement of the EU in regulating private conduct and relationships between individuals is increasing As a result EU law affects the scope of private autonomy in ever wider contexts sparking tensions with fundamental concepts of national private law systems This volume offers a descriptive and normative account of the involvement of EU law in private law relationships The recurring theme in the collected papers is the scope of policy objectives which are apt to legitimise the European Union's as yet unsystematic tendency to serve as a source of restrictions of private autonomy The nature and purpose of the involvement of European Union law in private law relationships is investigated by the authors from both the substantive and the constitutional perspective The papers look at such sectors regulating private law relationships as consumer law labour law competition law equal treatment law and the law of remedies While focusing on private law relationships the authors investigate more general concepts of EU law such as the Internal Market freedoms and general principles of law and the different modes of ensuring the effective application of EU secondary law

The Making of Consumer Law and Policy in Europe Hans-W. Micklitz, 2021-11-04 This book analyses the founding years of consumer law and consumer policy in Europe It combines two dimensions the making of national consumer law and the making of European consumer law and how both are intertwined The chapters on Germany Italy the Nordic countries and the United Kingdom serve to explain the economic and the political background which led to different legal and policy approaches in the then old Member States from the 1960s onwards The chapter on Poland adds a different layer the one of a former socialist country with its own consumer law and how joining the EU affected consumer law at the national level The making of European consumer law started in the 1970s rather cautiously but gradually the European Commission took an ever stronger position in promoting not only European consumer law but also in supporting the building of the European Consumer Organisation BEUC the umbrella organisation of the national consumer bodies The book unites the early protagonists who were involved in the making of consumer law in Europe Guido

Alpa Ludwig Kr mer Ewa Letowska Hans W Micklitz Klaus Tonner Iain Ramsay and Thomas Wilhelmsson supported by the younger generation Aneta Wiewi rowska Domagalska Mateusz Grochowski and Koen Docter who reconstructs the history of BEUC Niklas Olsen and Thomas Roethe analyse the construction of this policy field from a historical and sociological perspective This book offers a unique opportunity to understand a legal and political field that of consumer law and policy which plays a fundamental role in our contemporary societies
