The Conservation Response Lloyd J. Dumas,1976 *The Conservation Response* ,1976 **Transportation Energy Conservation Data Book** ,1976 Energy Abstracts for Policy Analysis ,1989-07 Housing and Planning References ,1977 **Guide to industrial assessments for pollution prevention and energy efficiency** , Housing and Planning References United States. Department of Housing and Urban Development. Library,1977 **The Peacekeeping Economy** Lloyd J. Dumas,2011-01-01 The idea that military strength is virtually synonymous with security is deeply entrenched and widely held But while the threat or use of military force may sometimes be necessary it cannot keep us as safe as we would be by building relationships that replace hostility with a sense of mutual purpose and mutual gain Economic relationships says Lloyd J Dumas can offer a far more effective and far less costly means of maintaining security After defining the right kind of economic relationship one that is balanced and nonexploitative emphasizes development and minimizes environmental damage Dumas then addresses some practical concerns in establishing and maintaining these relationships He also considers the practical problems of the transition from military based security arrangements to economic peacekeeping and the effects of demilitarized security on economic development and prosperity **The Technology Trap** Lloyd J. Dumas,2010-09-02 In this eye opening book author Lloyd J Dumas argues that our capacity for developing ever more powerful technologies and the unavoidable fallibility of both machine and man will lead us towards a disaster of an unprecedented scale Most of us assume that those in charge can always find a way to control any technology mankind creates no matter how powerful But in a world of imperfect human beings who are prone to error emotion and sometimes to malevolent behavior this could be an arrogant and disastrous assumption This book is filled with compelling factual stories that illustrate how easy it is for situations to go terribly wrong despite our best efforts to prevent any issue The author is not advocating an anti technology return to nature nor intending to highlight the marvels of our high tech world Instead the objective is to reveal the potential for disaster that surrounds us in our modern world elucidate how we arrived at this predicament explain the nature and ubiquity of human fallibility expose why proposed solutions to these Achilles heels cannot work and suggest alternatives that could thwart human induced technological disasters **Transportation** ,1977-08 Improving Energy Efficiency United States Air Force Academy. Library,Suzanne Lincoln,1979 This bibliography was prepared to assist participants in the 21st Air Force Academy Assembly to be held at the Academy on 16 21 April 1979 It represents a selected portion of the Air Force Academy Library s holdings on the topic indicated **Special Bibliography Series** ,1957 **Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office,1977 **Fossil Energy Update** ,1982 **Energy Policy** Sandra C. Danforth,1982 Twenty-first Century Macroeconomics Jonathan M. Harris,Neva R. Goodwin,2009 The likely economic effects of climate change and the cost of action to avert it are important public policy issues but according to the editors both of the Global Development and Environment Institute Tufts U they also

raise fundamental questions about economic analysis and move issues of environmental policy from the microeconomic to the macroeconomic level They therefore present 13 papers addressing the connections between climate change and macroeconomics Opening chapters address fundamental issues of the likely global economic impact of climate change the debate over the economics of climate change as presented in a special 2006 issue of the Stern Review that was commissioned by the government of the UK the place of the climate change debate in the context of broader issues of equitable and sustainable development and a proposed system for allocating carbon emissions reduction requirements The next four chapters present macroeconomic theory perspectives that address issues of energy productivity labor productivity sustainable development consumption and investment Remaining contributions explore policy options including the new European emissions trading scheme *Energy And The Social Sciences* Ernest J Yanarella, Ann-marie Yanarella, 1982-06-27
