Chief Economist of the World Bank and Professors of Economics at Ivy League Universities **Aspects of Urbanization in China** Gregory Bracken, 2012 China's opkomst als wereldmacht is een van de ingrijpendste gebeurtenissen van deze tijd. Honderden miljoenen mensen zijn de armoede ontvlucht dankzij de snelle industrialisatie van het land. De wonderbaarlijke economische groei van China heeft zijn nadelen: iets wat vaak het meest pijnlijk duidelijk wordt in de steden. Deze studie is geschreven door wetenschappers uit verschillende disciplines waaronder architectuur, stedenbouw, sociale wetenschappen, aardrijkskunde en antropologie. Een deel van de auteurs behandelt de mondiale ambities van de steden, terwijl andere hun culturele en architecturale uitingen onderzoeken. Young Chinese in Urban China Alex Cockain, 2012-08-21 This book examines the condition of being a young person in China and the way in which changes in various dimensions of urban life have affected Chinese youths' quests to understand themselves. The author examines social factors such as changes in the physical construction of urban neighbourhoods, changes in family life including reduced family size, increasing rates of divorce and increased physical mobility of the family unit, school life and mounting pressure to perform well in examinations and be a good student, access to foreign and domestic media as well as access to the internet. Drawing on the fields of social and cultural anthropology, Alex Cockain shows that the process of self-understanding in a changing spatial, social and cultural world involves ongoing, disjointed efforts to achieve a sense of security and belonging on the one hand and a degree of increased autonomy in their relationships with, for example, parents and teachers on the other. This book will appeal to anyone interested in Chinese Society, Social and Cultural Anthropology, Asian Anthropology and Youth Studies. **New Mentalities of Government in China** David Bray, Elaine Jeffreys, 2016-01-13 China continues to transform apace, flowing from the forces of deregulation, privatization and globalization unleashed by economic reforms which began in late 1978. The dramatic scope of economic change in China is often counterposed to the apparent lack of political change as demonstrated by continued Chinese Communist Party (CCP) rule. However, the ongoing dominance of the CCP belies the fact that much has also changed in relation to practices of government, including how authorities and citizens interact in the management of daily life. **New Mentalities of Government in China** examines how the privatization and professionalization of public service provision is transforming the nature of government and everyday life in the People's Republic of China (PRC). The book addresses key theoretical questions on the nature of government in China and documents the emergence of a range of new mentalities of government in China. Its chapters focus on areas such as clinical trials, conceptualizing government, consumer activity, elite philanthropy, lifestyle and beauty advice, public health, social work, volunteering and urban and rural planning. Offering a topical examination of shifting modes of governance in contemporary China, this book will appeal to scholars in the fields of anthropology, history, politics and sociology. **Postsocialism** C.M. Hann, 2003-09 Social scientists did not predict the collapse of the socialist system in 1989-91. Their attempts to explain postsocialism have not been comprehensive. This book examines why, for the first time, from an anthropological standpoint. **Encyclopedia of Consumer Culture** Dale

argue that if China does not adapt the rule of clear and distinct property and contract law in short of Western institutions its economy will stall The second set of voices is more clearly from the left arguing that the Chinese economy and city is neo liberal For them China does not diverge widely from the Anglo American model that from 2008 has brought the world economy to its knees China Constructing Capitalism takes issue with these analyses The authors argue that it is not Western neo liberalism that is constructing the Chinese economy but instead that China is constructing its own version of capitalism The two central theses of their argument are economic life neo liberal economic life is individualized and disembedded while the China model is relational and situated urban change China has created a form of local state capitalism which stands in contrast to neoliberal versions of the city This book analyses China as a risk culture examining among others Chinese firms and political ties property development migrant urbanisms and share trading rooms It scrutinises the ever present shadow of the risk averse yet uncertainty creating state China Constructing Capitalism is a must read for social scientists policy makers and investors
