The Contingency Of Theory Pragmatism Expressivism And Deconstruction:

The Contingency of Theory Gary Wihl, 1994 Deconstruction - Derrida Julian Wolfreys, 1998-06-22 Deconstruction Derrida contests the notion that what Jacques Derrida does can be turned into a theory for literary interpretation It also questions the idea that there is a critical methodology called deconstruction which can be applied to literary texts in a programmatic fashion In this introductory study to the work of Jacques Derrida Julian Wolfreys introduces the reader to a range of Derrida s interests and concerns while offering readings informed by Derrida s thought of canonical and less well known literary works The Bloomsbury Handbook of Pragmatism Sami Pihlström, 2024-02-22 Pragmatism provides not just a theoretical perspective on science and inquiry but ways of being in the world of knowing the reality we inhabit Approaching this philosophical tradition as a diverse set of philosophies that it is The Bloomsbury Handbook of Pragmatism introduces many of the ideas and debates at the centre of the field today Focusing on issues in different subject areas this up to date handbook covers current research in aesthetics economics education ethics history law metaphysics politics race religion science and technology language and social theory Supported by an introduction to research methods and problems as well as a guide to past and future directions in the field chapters are enhanced by a how to use guide and glossary Now expanded this edition includes new chapters on pragmatism and various global and regional philosophical traditions as well as feminism and environmental philosophy Showing where important work continues to be done the tensions that exist and most valuably the exciting new directions the field is taking The Bloomsbury Handbook of Pragmatism advances our understanding of the role of pragmatism in 21st century philosophy *The Bloomsbury Companion to Pragmatism* Sami Pihlström, 2015-05-21 Pragmatism provides not just a theoretical perspective on science and inquiry but ways of being in the world of knowing the reality we inhabit Approaching this philosophical tradition as a diverse set of philosophies that it is The Bloomsbury Companion to Pragmatism introduces many of the ideas and debates at the centre of the field today Focusing on issues in 12 different subject areas this up to date companion covers current research in aesthetics economics education ethics history law metaphysics politics race religion science and technology language and social theory Supported by an introduction to research methods and problems as well as a guide to past and future directions in the field the chapters are also enhanced by a glossary research guide and an annotated bibliography For anyone working in contemporary pragmatism or modern American philosophy more generally this companion provides a practical means of navigating what can sometimes feel like a disparate field Showing where important work continues to be done the tensions that exist and most valuably the exciting new directions the field is taking The Bloomsbury Companion to Pragmatism expands our understanding of the role of pragmatism in 21st century philosophy **The Continuum Companion to Pragmatism** Sami Pihlström, 2011-06-30 The Continuum Companion to Pragmatism offers the definitive guide to a key area of contemporary philosophy The book covers all the fundamental questions asked by pragmatism areas that have continued to attract interest historically as well as topics

Deconstruction Christopher Norris, 2003-12-16 While in no way oversimplifying its complexity or glossing over the challenges it presents Norris's book sets out to make deconstruction more accessible to the open minded reader

Rhetoric, Sophistry, Pragmatism Steven Mailloux, 1995-05-18 The anti sceptical relativism and self conscious rhetoric of the pragmatist tradition which began with the Older Sophists of Ancient Greece and developed through an American tradition including William James and John Dewey has attracted new attention in the context of late twentieth century postmodernist thought At the same time there has been a more general renewal of interest across a wide range of humanistic and social science disciplines in rhetoric itself language use writing and speaking persuasion figurative language and the effect of texts This book written by leading scholars explores the various ways in which rhetoric sophistry and pragmatism overlap in their current theoretical and political implications and demonstrates how they contribute both to a rethinking of the human sciences within the academy and to larger debates over cultural politics

Embodying Pragmatism Wojciech Mąlecki, 2010 Embodying Pragmatism is the first monograph in English devoted to Richard Shusterman an internationally renowned philosopher and one of today's most innovative thinkers in pragmatism and aesthetics The book presents a comprehensive account of Shusterman's principal philosophical ideas concerning pragmatism aesthetics and literary theory including such themes as interpretation aesthetic experience popular art and human embodiment culminating in his proposal of a new discipline called somaesthetics As Shusterman's philosophical writings involve a dialogue with both analytic and continental traditions this monograph not only offers a critical vision of contemporary pragmatist thought but also situates Shusterman and pragmatism within the current state of theory

The Derrida Reader Jacques Derrida, 1998-01-01 In the English speaking world Jacques Derrida's writings have most influenced the discipline of literary studies Yet what has emerged since the initial phase of Derrida's influence on the study of English literature classed under the rubric of deconstruction has often been disowned by Derrida What then can Derrida teach us about literary language about the rhetoric of literature and about questions concerning style form and structure The Derrida Reader draws together a number of Derrida's most interesting and idiosyncratic essays that treat literary language the idea of the literary and questions of poetics and poetry The essays discuss single tropes or concepts a figure such as metaphor the ideas of titles and signatures proper names and Derrida's thinking on such subjects as undecidability or aporia The editor's

introduction is a demonstration in practice of how Derrida reads and how he adapts the act of reading to the text or figure in question The introduction also outlines each essay's main points its usefulness for reading literary texts and its particular area of interest The Derrida Reader thus provides students of literature with a focused contextualized and readily understandable volume Heart of Darkness Joseph Conrad, 2011-03 This volume presents the text of the 1921 Heinemann edition of Conrad's classic short novel along with documents that place the work in historical context and critical essays that read Heart of Darkness from several contemporary critical perspectives The text and essays are complemented by biographical and critical introductions bibliographies and a glossary of critical and theoretical terms In this third edition the section of cultural documents and illustrations is entirely new as are two recent exemplary critical essays by Gabrielle McIntire and Tony C Brown that synthesize a variety of current critical approaches **Shakespeare in Theory** Stephen Bretzius, 1997 Witty and engaging essays on the links between contemporary literary theory and Shakespearean theater

The Dark Matter of Words Timothy Walsh, 1998 Timothy Walsh's study of the function and significance of absence in literature demonstrates its centrality in terms of both literary technique and philosophical consequence Textual gaps narrative lacunae and strategic vagueness together with the uncertainties that such devices inevitably generate have been essential elements of literature from Lao Tzu to Lawrence from Chaucer to Faulkner and beyond Walsh finds that poststructural approaches to indeterminacy tend to overlook the specific and productive roles that absence and uncertainty often play within the overall design of a work The aesthetic generation of uncertainty he demonstrates is not a roadblock on the path to meaning or a sign of some radical and suppressed internal contradiction rather it is as basic an artistic aim as the desire to evoke sympathy laughter or outrage Coining the phrase structured absence to explain a central tenet in his discussion of the mechanics of uncertainty Walsh analyzes various literary devices and tropes involved in generating a felt sense of absence and a purposeful uncertainty Structured absences he demonstrates combine to form intricate patterns and networks which explains how the dynamic potential of uncertainty can increase exponentially through a deft orchestration of absence Walsh argues that the use of absence in works of art of silence shadow blankness and void is a principal means by which the inherent biological limitations of human consciousness and of human language are encoded in aesthetic constructs Because of the limitations of our senses and because we often are more attuned to what lies beyond the threshold of perceptual limits the lacunae in artistic works represent attempts to replicate the real and inescapable limits of human experience **Feeling in Theory** Rei Terada, 2009-07-01 Because emotion is assumed to depend on subjectivity the death of the subject described in recent years by theorists such as Derrida de Man and Deleuze would also seem to mean the death of feeling This revolutionary work transforms the burgeoning interdisciplinary debate on emotion by suggesting instead a positive relation between the death of the subject and the very existence of emotion Reading the writings of Derrida and de Man theorists often seen as emotionally contradictory and cold Terada finds grounds for construing emotion as nonsubjective

This project offers fresh interpretations of deconstruction's most important texts and of Continental and Anglo American philosophers from Descartes to Deleuze and Dennett. At the same time it revitalizes poststructuralist theory by deploying its methodologies in a new field: the philosophy of emotion. To reach a startling conclusion: if we really were subjects we would have no emotions at all. Engaging debates in philosophy, literary criticism, psychology and cognitive science from a poststructuralist and deconstructive perspective. Terada's work is essential for the renewal of critical thought in our day.

Architecture Depends Jeremy Till, 2013-02-08 Polemics and reflections on how to bridge the gap between what architecture actually is and what architects want it to be. Architecture depends on what. On people, time, politics, ethics, mess, the real world. Architecture, Jeremy Till argues with conviction in this engaging, sometimes pugnacious book, cannot help itself: it is dependent for its very existence on things outside itself. Despite the claims of autonomy, purity and control that architects like to make about their practice, architecture is buffeted by uncertainty and contingency. Circumstances invariably intervene to upset the architect's best laid plans at every stage in the process, from design through construction to occupancy. Architects however tend to deny this, fearing contingency and preferring to pursue perfection. With *Architecture Depends*, architect and critic Jeremy Till offers a proposal for rescuing architects from themselves: a way to bridge the gap between what architecture actually is and what architects want it to be. Mixing anecdote, design, social theory and personal experience, Till's writing is always accessible, moving freely between high and low registers, much like his suggestions for architecture itself.

Religion and Culture in Renaissance England Claire McEachern, Debora Shuger, 1997-06-28 These essays by leading historians and literary scholars investigate the role of religion in shaping political, social and literary forms and their reciprocal role in shaping early modern religion from the Reformation to the Civil Wars. Reflecting and rethinking the insights of new historicism and cultural studies, individual essays take up various aspects of the productive if tense relation between Tudor, Stuart Christianity and culture and explore how religion informs some of the central texts of English Renaissance literature: the vernacular Bible, Foxe's *Acts and Monuments*, Hooker's *Laws*, Shakespeare's plays and sonnets, the poems of John Donne, Amelia Lanyer and John Milton. The collection demonstrates the centrality of religion to sixteenth and seventeenth century England and its influence on early modern constructions of gender, subjectivity and nationhood.

Charles Taylor Ruth Abbey, 2014-12-23 Charles Taylor is one of the most influential and prolific philosophers in the English speaking world today. The breadth of his writings is unique, ranging from reflections on artificial intelligence to analyses of contemporary multicultural societies. This thought provoking introduction to Taylor's work outlines his ideas in a coherent and accessible way without reducing their richness and depth. His contribution to many of the enduring debates within Western philosophy is examined and the arguments of his critics assessed. Taylor's reflections on the topics of moral theory, selfhood, political theory and epistemology form the core chapters within the book. Ruth Abbey engages with the secondary literature on Taylor's work and suggests that some criticisms by contemporaries have been based on

misinterpretations and suggests ways in which a better understanding of Taylor's work leads to different criticisms of it. The book serves as an ideal companion to Taylor's ideas for students of philosophy and political theory and will be welcomed by the non-specialist looking for an authoritative guide to Taylor's large and challenging body of work. **Deconstruction**

Is/In America Anselm Haverkamp, 1995-01-01 What impact has deconstruction had on the way we read American culture? And how is American culture itself peculiarly deconstructive? To address these questions this volume brings together some of the most provocative thinkers associated with deconstruction among them Jacques Derrida, Judith Butler and Avital Ronell. Ranging across a wide field from the ethics of reading to the rhetoric of performance the contributors offer provocative insights into a new sense of the political. The America of the volume's title turns out to be the place where the politics and poetics of responsibility meet. It is also the place where we confront the tension between difference and profound otherness.

Absolutely Postcolonial Peter Hallward, 2001 This innovative book provides an incisive critique of well established positions in postcolonial theory and a dramatic expansion in the range of interpretative tools available. Peter Hallward gives substantial readings of four significant writers whose work invites to varying degrees a singular interpretation of postcolonialism: Edouard Glissant, Charles Johnson, Mohammed Dib and Severo Sarduy. Using a singular interpretation of postcolonialism is central to the argument this book makes and to understanding the postcolonial paradigm. **University**
