Sargent,1907 *The Private Secretary* Charles Hawtrey,1907 *Jesuit Science and the End of Nature's Secrets* Mark A. Waddell,2016-03-09 Jesuit Science and the End of Nature s Secrets explores how several prominent Jesuit naturalists including Niccol Cabeo Athanasius Kircher and Gaspar Schott tackled the problem of occult or insensible causation in the seventeenth century The search for hidden causes lay at the heart of the early modern study of nature and included phenomena such as the activity of the magnet the marvelous powers ascribed to certain animals and plants and the hidden destructive forces churning in the depths of the Earth While this was a project embraced by most early modern

naturalists however the book demonstrates that the Jesuits were uniquely suited to the study of nature's hidden secrets because of the complex methods of contemplation and meditation enshrined at the core of their spirituality Divided into six chapters the work documents how particular Jesuits sought to reveal and expose nature's myriad secrets through an innovative blending of technology imagery and experiment Moving beyond the conventional Aristotelianism mandated by the Society of Jesus they set forth a vision of the world that made manifest the works of God as Creator no matter how deeply hidden those works were The book thus not only presents a narrative that challenges present day assumptions about the role played by Catholic religious communities in the formation of modern science but also captures the exuberance and inventiveness of the early modern study of nature *Science and Technology in World History, Volume 4* David Deming, 2016-04-05 The history of science is a story of human discovery intertwined with religion philosophy economics and technology The fourth in a series this book covers the beginnings of the modern world when 16th century Europeans began to realize that their scientific achievements surpassed those of the Greeks and Romans Western Civilization organized itself around the idea that human technological and moral progress was achievable and desirable Science emerged in 17th century Europe as scholars subordinated reason to empiricism Inspired by the example of physics men like Robert Boyle began the process of changing alchemy into the exact science of chemistry During the 18th century European society became more secular and tolerant Philosophers and economists developed many of the ideas underpinning modern social theories and economic policies As the Industrial Revolution fundamentally transformed the world by increasing productivity people became more affluent better educated and urbanized and the world entered an era of unprecedented prosperity and progress
