movement in the past decade **Seoul, Korea's Global City** Kyoung-Ho Shin, Michael Timberlake, 2020-05-27 Seoul as one of Asia's rising global cities has been a place where enormous changes in politics, industry and culture have taken place over the last five decades. This book explores the new urbanism in Seoul from the perspective of global political economy, focusing on the contexts in which the city has witnessed the transformation of its population structure, such as the rise of the global urban middle class and the city's increased nodal function in commodity chains. The burgeoning signs of Seoul's status as a global city are discussed in terms of transnational tourism and the frequency of study abroad, the immigrant community and cross-border cultural flows. Examining the labour structures within the city, economic growth policy, the role of advanced information technology and neoliberal urban development, the authors also examine the local response in the city to its emerging status. A study of the development of the Korean capital and its deep embeddedness in the world economy, Seoul, Korea's Global City will appeal to scholars of sociology, geography and economics with interests in political economy, urban studies and Asian studies **Europe in the Global Space Economy** Patrizia Caraveo, Clelia Iacomino, 2023-08-28 This book analyzes the policies and space economy programs of major space-faring nations and explores whether the present institutional set-up in Europe is adequate to address the challenges. At the core of the discussion are the relative roles of governments and markets in a highly dynamic panorama that involves advancements in science, modifications in technology and organization and the introduction of new rules of behavior. After a close examination of the history of development of the space economy and the shift from the centralized model to deregulation and the opening up of space activities to commercial companies, a wide-ranging overview of global space governance is provided. National and regional perspectives are discussed and the current role of commercial actors in the global space system is elucidated. The various challenges faced by Europe are then examined, including the threat posed by institutional and market fragmentation to the emergence of European companies able to compete with companies of nations such as the USA. The final part of the book analyzes proposals for reforming of the space system in Europe and offers a vision for future European space policy *Globalization and After* Samir Dasgupta, Ray Kiely, 2006-09-07 Addresses many questions concerning the form of globalisation, such as: Does globalization involve integration on a worldwide scale or will there be a levelling off or even a reversal? Is there an alternative to globalization? This work explores the tensions and dilemmas inherent in globalization from local, national and global perspectives.
