The Origins Of Graphic Design In America 1870 19:

The Origins of Graphic Design in America, 1870-1920 Burton Raffel, Ellen Mazur Thomson, 1997-01-01 By the time the phrase graphic design first appeared in print in 1922 design professionals in America had already created a discipline combining visual art with mass communication In this book Ellen Mazur Thomson examines for the first time the early development of the graphic design profession It has been thought that graphic design emerged as a profession only when European modernism arrived in America in the 1930s yet Thomson shows that the practice of graphic design began much earlier Shortly after the Civil War when the mechanization of printing and reproduction technology transformed mass communication new design practices emerged Thomson investigates the development of these practices from 1870 to 1920 a time when designers came to recognize common interests and create for themselves a professional identity What did the earliest designers do and how did they learn to do it What did they call themselves How did they organize themselves and their work Drawing on an array of original period documents the author explores design activities in the printing type founding advertising and publishing industries setting the early history of graphic design in the context of American social history

'The industrialized designer' Leah Armstrong, 2024-10-23 What does it mean to be called an industrial designer This book traces the remarkable rise of this professional identity in historical perspective from a position of anonymity in the early twentieth century to mid century professionalisation to decline and disintegration by 1980 Drawing on new extensive original archival research it uncovers the history of a profession in a state of re invention 1930 1980 in Britain and the United States The book tests assumptions about the relationship between the professions in the two countries bringing them into comparative historical perspective for the first time The gendered dynamics of professionalisation and their interaction with the representation of the heroic male designer are interrogated and critically examined Building on new gender perspectives to the history of the industrial design profession the book calls for a re examination of the limits and boundaries of what constitutes professional identity and work

The Art of the Literary Poster Allison Rudnick, 2024-03-07 Spurred by innovations in printing technology the modern poster emerged in the 1890s as a popular form of visual culture in the

United States Created by some of the best known illustrators and graphic designers of the period including Will H Bradley Florence Lundborg Edward Penfield and Ethel Reed these advertisements for books and high tone periodicals such as Harper s and Lippincott s went beyond the realm of commercial art incorporating bold stylized imagery and striking typography This book based on the renowned Leonard A Lauder Collection explores the craze for literary posters which became sought after collectibles even in their day It offers new scholarly perspectives that address the aesthetic sophistication and modernity of the literary poster the impact of early experiments in the field of advertising psychology the expanded opportunities for women artists who played an important role in advancing the so called poster style and the printmaking techniques that artists employed in this novel art form A lively survey of a little known but highly influential period in graphic design *The Art of the Literary Poster* is sure to delight enthusiasts of illustration advertising and book arts Commercial Intimacy Richard Popp,Brenton Malin,Wendy A. Woloson,2025-06-03 Explores how marketers have leveraged feelings of personal familiarity in modern consumer capitalism Our wired world connects us with corporations in ways that just a generation ago would have been hard to imagine Marketers track users habits down to the swipe and scroll brand influencers reach out to followers in ever more personal ways Yet however much we may feel individually recognized or targeted by today s marketers the connections they make are in truth fleeting and tactical They are also nothing new Marketplace transactions have long been mediated by interactions that blur the line between the putatively public and rational world of commerce and the supposedly private and emotional realm of personal relations That there is an affective tenor to every sales scenario has never been a secret to talented marketers How exactly marketers have tried to set those moods by endowing commercial relationships with an aura of personal affinity is the subject of *Commercial Intimacy* Its chapters explore the broad theme of commercial intimacy that is market based feelings of spatial and emotional closeness in US consumer culture from the mid nineteenth century to the late twentieth century They show how experiences of intimacy have been orchestrated by marketers operating at a variety of distances from the face to face solicitations made by retail clerks and direct sales agents to the long distance appeals made by mail order merchants print and TV advertisers telemarketers and e commerce platforms The volume pays especially close attention to how these revenue minded acts of ingratiation worked how they were shaped by the technologies behind them and how they capitalized on contemporary dynamics of gender and sexuality At the heart of this volume then is the question of how our understanding of business history changes when we take the emotional sensational and affective dynamics of intimacy to be foundational elements of commercial persuasion Contributors Samuel Backer Jennifer M Black Donna J Drucker Isabelle Marina Held Julie A Johnson Lindsay Mitchell Keiter Stephanie Kolberg Brenton J Malin Cynthia B Meyers Richard K Popp Nicole E Weber Wendy A Woloson *Clarence H. White and His World* Anne McCauley,2017-01-01 Restoring a gifted art photographer to his place in the American canon and in the process reshaping and expanding our understanding of early 20th century American photography Clarence H White 1871 1925 was one of the

most influential art photographers and teachers of the early 20th century and a founding member of the Photo Secession This beautiful publication offers a new appraisal of White s contributions including his groundbreaking aesthetic experiments his commitment to the ideals of American socialism and his embrace of the expanding fields of photographic book and fashion illustration celebrity portraiture and advertising Based on extensive archival research the book challenges the idea of an abrupt rupture between prewar soft focus idealizing photography and postwar modernism to paint a more nuanced picture of American culture in the Progressive era Clarence H White and His World begins with the artist s early work in Ohio which shares with the nascent Arts and Crafts movement the advocacy of hand production closeness to nature and the simple life White s involvement with the Photo Secession and his move to New York in 1906 mark a shift in his production as it grew to encompass commercial portraiture and an increasing commitment to teaching which ultimately led him to establish the first institutions in America to combine instruction in both technical and aesthetic aspects of photography The book also incorporates new formal and scientific analysis of White s work and techniques a complete exhibition record and many unpublished illustrations of the moody outdoor scenes and quiet images of domestic life for which he was revered

"Women and the Material Culture of Needlework and Textiles, 1750-1950" Maureen Daly Goggin, 2017-07-05 Rejecting traditional notions of what constitutes art this book brings together essays on a variety of fiber arts to recoup women s artistic practices by redefining what counts as art Although scholars over the last twenty years have turned their attention to fiber arts redefining the conditions practices and products as art there is still much work to be done to deconstruct the stubborn patriarchal art craft binary With essays on a range of fiber art practices

including embroidery knitting crocheting machine stitching rug making weaving and quilting this collection contributes to the ongoing scholarly redefinition of women's relationship to creative activity Focusing on women as producers of cultural products and creators of social value the contributors treat women as active subjects and problematize their material practices and artifacts in the complex world of textiles Each essay also examines the ways in which needlework both performs gender and in turn constructs gender Moreover in concentrating on and theorizing material practices of textiles these essays reorient the study of fiber arts towards a focus on process the making of the object including the conditions under which it was made by whom and for what purpose as a way to rethink the fiber arts as social praxis
