colleges a solution to increasing access to and capacity in higher education Will the conferring of baccalaureate degrees restrict open access to and imperil the existing mission of community colleges What are the models and alternative methods of delivery What are the implications Breaking away from their traditional mission of conferring only associate degrees and occupational credentials an increasing number of community colleges have begun seriously to explore and indeed in some U S states and Canadian provinces to actually implement offering and conferring bachelor s degrees Some leaders see these changes as a natural extension of community colleges commitment to access while others view their awarding of baccalaureate degrees as inappropriate and threatening the basic core values of this unique sector of higher education This has become a hot and controversial topic not only among community college and university leaders but also among policy makers business leaders and students concerned with issues of access cost and the structure and purposes of post secondary education This book analyzes the emerging trend of the community college baccalaureate degree in the United States and Canada in order to contribute to the development of policy The authors aim to describe document and explain this significant development in higher education They present the background examples of practice and different models of delivery develop a common terminology to facilitate discussion give voice to the views of proponents and critics alike and include a comprehensive bibliography and set of resources This book is intended as a catalyst for dialog action and further research on this critical and emerging trend It is essential reading for leaders of community colleges for administrators and planners in higher education concerned with issues of access and articulation and anyone in public policy grappling with demographic trends and society s need for educated citizens able to meet the challenges of the future *The Community College Story*

Weidman, John L. Yeager, 2015-06-17 There seems to be renewed interest in having universities and other higher education institutions engage with their communities at the local national and international levels But what is community engagement Even if this interest is genuine and widespread there are many different concepts of community service outreach and engagement The wide range of activity encompassed by community engagement suggests that a precise definition of the community mission is difficult and organizing and coordinating such activities is a complex task This edited volume includes 18 chapters that explore conceptual understandings of community engagement and higher education reforms and initiatives intended to foster it Contributors provide empirical research findings including several case study examples that respond to the following higher education community engagement issues What is the community and what does it need and expect from higher education institutions Is community engagement a mission of all types of higher education institutions or should it be the mission of specific institutions such as regional or metropolitan universities technical universities community colleges or indigenous institutions while other institutions such as major research universities should concentrate on national and global research agendas and on educating internationally competent researchers and professionals How can a university be global and at the same time locally relevant Is it or should it be left to the institutions to determine the scope and mode of their community engagement or is a state mandate preferable and feasible If community engagement or community service are mandatory what are the consequences of not complying with the mandate How effective are policy mandates and university engagement for regional and local economic development What are the principal features and relationships of regionally engaged universities Is community engagement to be left to faculty members and students who are particularly socially engaged and locally embedded or is it or should it be made mandatory for both faculty and students How can community engagement be better integrated with the other two traditional missions of the university research and teaching Cover image The Towering Four fold Mission of Higher Education by Natalie Jacob **History of Higher Education Annual 2002**

Hirt, 2006-03-02 This volume challenges the widely held assumption that the professional practice of student affairs administration transcends the influence of organizational culture Based on data and commentaries from more than 1 100 practitioners this book describes how the experience of student affairs administrators varies by institutional type The findings paint a multifaceted and integrated portrait of the profession For instance the standard bearers at liberal art colleges share as much in common with the generalists at comprehensive institutions as they do with the interpreters at religiously affiliated campuses The specialists at research universities are juxtaposed against the producers at community colleges however they have closer ties to the

change agents at Hispanic serving institutions The work of the guardians at historically Black colleges and universities is linked to practice at both liberal arts and community colleges Where You Work Matters offers current and future administrators a greater appreciation for the vibrancy and complexity of the student affairs profession **Higher**
