Ann Louise Perkins,1949      **The Archaeology of Seafaring in Ancient South Asia** Himanshu Prabha Ray,2003-08-14 Prior to European expansion communities of the Indian subcontinent had a strong maritime orientation In this new archaeological study Himanshu Prabha Ray explores seafaring activity religious travel and political economy in this ancient period By using archaeological data from the Red Sea to the Indonesian archipelago she reveals how the early history of peninsular South Asia is interconnected with that of its Asian and Mediterranean partners in the Indian Ocean Region The book departs from traditional studies focusing on the communities maritime history rather than agrarian expansion and the emergence of the state Rather than being a prime mover in social economic and religious change the state is viewed as just one participant in a complex interplay of social actors including merchants guilds boat builders sailors pilgrims religious clergy and craft producers A study that will be welcomed by students of Archaeology and Ancient History particularly those interested in South Asian Studies      **The Archaeology of the Kurdistan Region of Iraq and Adjacent Regions** Konstantinos Kopanias,John MacGinnis,2016-06-23 Conference proceedings presenting the first opportunity for leading figures in the burgeoning area of archaeological research in the Kurdish Autonomous Region of Iraq to gather and present all the key new projects which are revolutionising our understanding of the region      **The Comparative Archaeology of Complex Societies** Michael E. Smith,2011-09-05 Part of a resurgence in the comparative study of ancient societies this book presents a variety of methods and approaches to comparative analysis through the examination of wide ranging case studies Each chapter is a comparative study and the diverse topics and regions covered in the book contribute to the growing understanding of variation and change in ancient complex societies The authors explore themes ranging from urbanization and settlement patterns to the political strategies of kings and chiefs to the economic choices of individuals and households The case studies cover an array of geographical settings from the Andes to Southeast Asia The authors are leading archaeologists whose research on early empires states and chiefdoms is at the cutting edge of scientific archaeology      **Encyclopedia of Prehistory** Peter N. Greece Sinclair Hood,1994-01-01 Originally published in 1978 by Penguin Books      **Climate and Cultural Change in Prehistoric Europe and the Near East** Peter F. Biehl,Olivier P. Nieuwenhuys,2016-11-23 The subject of climate change could hardly be more timely In *Climate and Cultural Change in Prehistoric Europe and the Near East* an interdisciplinary group of contributors examine climate change through the lens of new archaeological and paleo environmental data over the course of more than 10 000 years from the Near East to Europe Key climatic and other events are contextualized with cultural changes and transitions for which the authors discuss when how and if changes in climate and environment caused people to adapt move or perish More than this publication of crucial archaeological and paleo environmental data however the volume seeks to understand the social political and economic significance of climate change as it was manifested in various ways around the Old World Contrary to perceptions of threatening global warming in our popular media and in contrast to grim images of collapse presented in some archaeological discussions of past climate change this book rejects outright societal collapse as a likely outcome Yet this does not keep the authors from considering climate change as a potential factor in explaining culture change by adopting a critical stance with regard to the long standing practice of equating synchronicity with causality and explicitly considering alternative explanations      *The Teaching of Anthropology* David Goodman Mandelbaum,1967      *The Teaching of Anthropology, Abridged Edition* David G. the ancient world placed in a modern perspective From Sumer to Rome provides a detailed portrait of the world s earliest military establishments A number of military innovations and developments that came to fruition in the Iron Age and that remained are traced An empirical analysis of all the major weapons of the ancient armies is made The factors that played dominant roles in outcomes are explored and thorough analysis of military medical care systems is provided This book will be an excellent addition to the libraries of military historians students of ancient warfare and weaponry and the general reader
