

The background of the book cover features a Concorde in flight, viewed from below, against a stylized American flag. The flag's stars and stripes are rendered in a soft, painterly style. Below the aircraft, a city skyline is visible, with the World Trade Center's Twin Towers prominently on the left. The sky transitions from a warm orange and yellow near the horizon to a deep blue at the top.

**The Concorde Conspiracy** John Costello, Terry Hughes, 1976      **Transport and Its Place in History** David Turner, 2020-06-07

Transport and mobility history is one of the most exciting areas of historical research at the present. As its scope expands, it entices scholars working in fields as diverse as historical geography, management studies, sociology, industrial archaeology, cultural and literary studies, ethnography and anthropology, as well as those working in various strands of historical research. Containing contributions exploring transport and mobility history after 1800, this volume of eclectic chapters shows how new subjects are explored, new sources are being encountered, considered and used, and how increasingly diverse and innovative methodological lenses are applied to both new and well-travelled subjects. From canals to Concorde, from freight to passengers, from screen to literature, the contents of this book will therefore not only demonstrate the cutting edge of research and deliver valuable new insights into the role and position of transport and mobility in history, but it will also evidence the many and varied directions and possibilities that exist for the field's future development.

*Speedbird* Robin Higham, 2013-05-30

Between 1939 and 1946 BOAC, the British Overseas Airways Corporation, was the nationalised airline of Great Britain, and between 1946 and 1974, as such, it exclusively operated all long-haul British flights. With its iconic Speedbird logo and its central role in the glamorous jet age of the 1950s and 1960s, BOAC achieved a near-cult status with admirers around the globe. Yet to date there has been no comprehensive history of the organisation covering its structure, fleet, and the role it played in the critical events of the age, from World War II to the end of empire, a period when BOAC played a pivotal part in projecting British political power, even as that power was waning. During World War II, BOAC operated a limited wartime service and prepared for the return of commercial flight in the postwar era. But it was in the service of Britain's colonies, and latterly the process of decolonisation, that BOAC achieved its most pivotal role. The development of flight technology enabled much faster connections between Britain and her imperial possessions, as the colonies prepared for independence. BOAC ferried diplomats, politicians, and colonial administrators between London and the far-flung corners of Africa and Asia in much faster times than had previously been possible. In this book, acclaimed historian Robin Higham presents a unique, comprehensive study of BOAC, from the early jet travel of the de Havilland Comet and the Vickers VC10 to the dawn of supersonic passenger aviation. Highly illustrated and meticulously researched, using previously unseen sources, this book will be essential reading for all aviation enthusiasts and anyone interested in the history of modern Britain.

**Supersonic: From Dreams to Reality** Pasquale De Marco, In the annals of aviation history, one aircraft stands as a shining testament to human ingenuity and the relentless pursuit of speed: the Concorde. This supersonic marvel, born from a bold vision shared by France and the United Kingdom, captured the imagination of the world and redefined the boundaries of air travel. In this comprehensive exploration, we take an in-depth look at the Concorde's remarkable journey from its conceptualization in the mid-20th century to its triumphant maiden flight and subsequent commercial service. We

delve into the technological innovations that made supersonic flight a reality including the challenges of aerodynamics engine design and fuel efficiency Beyond its technical marvels the Concorde experience was like no other We step inside the luxurious cabin adorned with elegant furnishings and thoughtful amenities where passengers enjoyed a level of comfort and exclusivity unmatched in the skies We meet the pilots and crew who skillfully navigated this extraordinary aircraft as well as the passengers who had the privilege of flying aboard the Concorde from celebrities and business tycoons to royalty and heads of state While the Concorde's safety record was generally commendable it was not without its challenges We analyze the notable incidents and near misses that occurred during its service including the tragic Air France crash in 2000 which ultimately led to its retirement We examine the lessons learned from these incidents and the improvements made to aviation safety as a result With the Concorde's retirement in 2003 an era of supersonic travel came to an end We reflect on the factors that contributed to this decision including economic pressures and changing market dynamics We visit the museums and exhibits where retired Concorde's are preserved allowing visitors to experience the legacy of this supersonic marvel Looking ahead we explore the future of supersonic travel We examine the next generation supersonic aircraft concepts and designs that are being developed promising to revolutionize air travel once again We discuss the technological advancements and challenges involved in creating sustainable and environmentally friendly supersonic flight We contemplate the ethical and regulatory considerations that must be addressed as supersonic travel moves beyond the realm of dreams and into reality This book is a celebration of the Concorde a tribute to the engineers pilots and visionaries who made supersonic flight a reality It is an exploration of the aircraft's cultural and historical significance its impact on the world of aviation and its enduring legacy as a symbol of human ambition and innovation If you like this book write a review

**Great Planning Disasters** Peter Hall,1982-03-22 In this pathology of planning Peter Hall briskly recounts the histories of five great planning disasters and two near disasters and analyzes the decisions of the professional bureaucrats community activists and politicians involved in the planning process He draws on an eclectic body of theory from political science economics ethics and long range future forecasting to suggest ways to forestall such grand mistakes in the future For this edition Hall has added a special introduction in which he reflects further on the sequels to these cautionary tales and on the moral planners and citizens should draw from them

**Thermal Structures for Aerospace Applications** Earl Arthur Thornton,1996

**Concorde Conspiracy** Graham M Simons,2012-03-01 An innovation in aviation development Concorde was the subject of political rivalry deceit and treachery

from its very inception After their failure to be the first nation to develop a jet airliner for transatlantic flight or to send spacecraft into space the US Government was adamant that they would beat other nations to the goal of supersonic flight and so development of the SST began However with McNamara and Shurcliff's negative attitudes to the project it was soon killed off Thus began the if we cannot do it neither can you attitude towards other countries efforts for supersonic flight This is the story of ten years of behind the scenes political intrigue making use of inside information from two American presidents and the Federal Aviation Authority as well as recently declassified papers from the CIA and President Kennedy on how the Americans planned to destroy Concorde and their own American SST Lavishly illustrated with black and white and colour images throughout Concorde Conspiracy is a must read for any enthusiast on supersonic flight and anyone who enjoys a real life conspiracy

**World Trade Since 1431** Peter J. Hugill, 1993 In 1431 the Portuguese navigator Velho set sail into the Atlantic establishing a trade route to the Azores and marking the beginning of commerce with the West as we know it today Equipped with reliable maps and instruments for open ocean navigation and highly sea worthy three masted cannon armed ships Portugal soon dominated the Atlantic trade routes until the diffusion of Portuguese technologies to wealthier polities made Holland the eventual successor owing to its geographic position and its immense commercial fleet

New Design Concepts for High Speed Air Transport H. Sobieczky, 2014-05-04 This book presents the challenges the tools and the concepts for developing economically viable high speed civil transport aircraft under environmental constraints Computational tools for aircraft design and optimization are outlined and application in an industrial environment is shown for new and innovative case studies

The New Republic Herbert David Croly, 1976 *The Enigma of the Aerofoil* David Bloor, 2011-10-03 Why do aircraft fly How do their wings support them In the early years of aviation there was an intense dispute between British and German experts over the question of why and how an aircraft wing provides lift The British under the leadership of the great Cambridge mathematical physicist Lord Rayleigh produced highly elaborate investigations of the nature of discontinuous flow while the Germans following Ludwig Prandtl in Göttingen relied on the tradition called technical mechanics to explain the flow of air around a wing Much of the basis of modern aerodynamics emerged from this remarkable episode yet it has never been subject to a detailed historical and sociological analysis In *The Enigma of the Aerofoil* David Bloor probes a neglected aspect of this important period in the history of aviation Bloor draws upon papers by the participants their restricted technical reports meeting minutes and personal correspondence much of which has never before been published and reveals the impact that the divergent mathematical traditions of Cambridge and Göttingen had on this great debate Bloor also addresses why the British even after discovering the failings of their own theory remained resistant to the German circulation theory for more than a decade The result is essential reading for anyone studying the history philosophy or sociology of science or technology and for all those intrigued by flight

The Hercules Story Martin W. Bowman, 2012-02-29 The C 130 Hercules first flew in 1954 an easily maintained aircraft which entered service with the

USAF Tactical Air Command Ten years later the Charlie 130 was providing the essential logistical support in Vietnam where a new landing technique the Khe Sanh approach added to the Hercules folklore Parachutes airlift and evacuation operations were completed around the clock often at low level usually under fire and nearly always in bad weather AC 130 gunships blasted the Ho Chi Minh Trail at night Lamplighters and Blind Bats dropped flares and others scattered defoliant pancake bombs and 15 000 Big Blue block busters But more than anything else it was in the role of Trash and Ass hauler that the C 130 earned unstinting admiration from ground troops and aircrews alike The Herky Bird or Fat Albert as the C 130 is fondly known went on to serve with similar panache in the Gulf War and in humanitarian relief operations around the world Today the modern C 130J version continues to provide the effective support for which the Hercules name is renowned *In Defence of Conspiracy Theories* Brian Nugent,2009 This book is an attempt to address the widespread criticism of conspiracy theories raising issues like the control and negligence of the main organs of the media and police which make it difficult for true information to reach the public and hence the public remain in ignorance of and dismiss as a conspiracy theory the true facts and the public's habit of underestimating the complexity of modern day politics A number of complex political plots and allegations are described in detail including the 1641 Rebellion British Intelligence manipulation of the 1919 21 Irish leaders Secret Societies and the role of Occult organisations in Ireland and around the world the allegations that Martin McGuinness is a British agent and the motivation behind large scale immigration into Ireland The author also addresses the question of value systems in modern Western societies and asks are even these being manipulated in order to assist the process of political control **The British Aircraft Industry and American-led Globalisation** Takeshi Sakade,2021-12-09 Sakade challenges the narrative that the focus of British manufacturing went from Empire to Europe and argues rather that following the Second World War the key relationship was in fact trans Atlantic There is a commonly accepted belief that during the twentieth century British manufacturing declined irreparably that Britain lost its industrial hegemony But this is too simplistic In fact in the decades after 1945 Britain staked out a new role for itself as a key participant in a US led process of globalisation Far from becoming merely a European player the UK actually managed to preserve a key share in a global market and the British defence industry was to a large extent successfully rehabilitated Sakade returns to the original scholarly parameters of the decline controversy and especially questions around post war decline in the fields of high technology and the national defence industrial base Using the case of the strategically critical military and civil aircraft industry he argues that British industry remained relatively robust A valuable read for historians of British aviation and more widely of 20th century British Industry **Night Fighters: A Development and Combat History** Bill Gunston,2004-01-15 From its beginnings during World War I the role of the dedicated night fighter aircraft and its pilots in the 21st century has evolved greatly This work reflects the massive changes in technology and in tactics It also covers the problems of tracking aerial targets by radar **Shadows in the Sky** Neil Arnold,2012-02-29 Although the saying Pigs might fly may bring a smile

to one's lips even stranger things have been reported as appearing in Britain's skies over the centuries. Eye witnesses have testified that various terrifying and bizarre forms have appeared in the skies from ghostly planes, phantom airships and UFOs to reports of sky serpents, celestial dragons, flying jellyfish, rains of fish or blood or metal or frogs, even reports of a griffin seen over London. It also considers reports of haunted aircraft hangars and airfields. *Shadows in the Sky* compiles hundreds of accounts from the spine-chilling to the downright bizarre that'll keep your eyes fixed looking upwards.      **Web of**

**Conspiracy** James F. Broderick, Darren W. Miller, 2008 From 9/11 to Roswell from Princess Di to the Grassy Knoll and beyond. Journalists James F. Broderick and Darren W. Miller Consider the Source explore more than 20 of the world's most intriguing conspiracy theories. They examine the facts surrounding each theory, present prevailing and lesser-known arguments and point to must-see Web sites that advocate, speculate and debunk. *Web of Conspiracy* is the ultimate guide for Internet-connected conspiracy theorists, buffs and researchers and an eye-opening book for anyone who thinks he's heard it all.
