The Only One:

Poetic Messages Barnabas Gunaraj, This book is the first collection of poems written over a period of maybe twenty five years It is a collage of ideas thoughts and satirical articles about love and vagaries of life It brings out many reflections on the ups and downs of life and the emotions of love in the form of verse and short articles which makes for easy reading It almost covers a whole gamut of emotions and anyone will find a poem for every mood and moment Tongue in cheek in quite a few places it seeks to bring out the humor in some of life s nondescript situations Combined with a social message in some of the works the book is a wholesome package for enjoyable reading **The Blessings** Reginald W. Elms,2012-01-26 Having this opportunity to write this book The Blessing The Spiritual side of Poetry Volume 2 of the series of Life Issues Is truly a privilege and honor I Thank God for the accolades in my life For he is the reason for the blessings I dont know what I would do without Him This book is personal but not just for me but for all mankind Its an entry into life issues to life situations that reveal the true blessing God is so amazing even through the diversity of our lives he still remains Faithful and true You have to love him because he loves you So walk in the likeness of him for he is The Blessing Amen **The Oneness and Simplicity of God** Barry D. Smith,2013-11-13 That YHWH is numerically one is foundational to the theology of the Hebrew Bible Christian theologians historically have affirmed that there is a more fundamental type of oneness attributable to God God is one not merely in the sense of being the only God but also in the sense of being simple or non composite having no parts of any kind In this way God is said to be an absolute unity After a consideration of all the evidence Barry D Smith reaches the conclusion that there is no basis for ascribing simplicity to God The simplicity doctrine is not found in Scripture and the traditional arguments used to establish it are unconvincing In addition the recent defenses of the simplicity doctrine prompted by Alvin Plantinga s work Does God Have a Nature are unsuccessful It should not be thought however that the rejection of divine simplicity means that by default God must be conceived as composite not even as a perfect composite with maximally great God making properties Rather there is a third option God should not be conceived as either simple or composite The question of in which mode God has attributes or exemplifies properties should be set aside [The First Book of Psalms in the Text of G.1.](#) ,2014-10-23 Originally published in 1920 this book contains the transcribed text of the G 1 manuscript in the Library of Trinity College Cambridge which was written in the fourteenth century and contains the first forty Psalms Sheppard provides a historical background to the manuscript and its creation as well as an overview its unique value to scholars of Hebrew as a Prince among manuscripts This book will be of value to anyone with an interest in medieval Hebrew and the transmission of the Jewish Scriptures [Standard Model And Beyond, The - Proceedings Of The Ninth Symposium On Theoretical Physics](#) Jihn E Kim,1991-06-13 The most recent LEP data is included in the lectures The subjects include Higgs physics KM angles weak CP violation neutron electric dipole moment SUSY phenomenology radiative corrections and e e experiments *The two reformations in the 16th century* H.A.Enno Gelder,2012-12-06 This book deals

with the religious aspects and consequences of the Renaissance and Humanism It is therefore advisable that these terms should first be defined to some extent By Renaissance is meant here the new element in Western European culture which became more and more evident in Italy during the 15th century and in about 1500 completely dominated the great minds in that country In the 16th century this new element was carried to the countries on the other side of the Alps where it developed vigorously during that century The new element in that culture is found in the plastic arts literature philosophy and also and this is the subject of the present study in a modified religious attitude The following chapters will show the content of this last change Problems such as what in general characterizes the Renaissance by what was it caused when did it begin and in particular whether the Renaissance forms a sharp contrast to the Middle Ages or whether it is a direct continuation of it will not be discussed here It will be clear from the above definition that I have placed first and foremost those things in the Renaissance which distinguish it from the Middle Ages

Orthodox Christian Renewal Movements in Eastern Europe Aleksandra Djurić Milovanović, Radmila Radić, 2017-10-11 This book explores the changes underwent by the Orthodox Churches of Eastern and Southeastern Europe as they came into contact with modernity The movements of religious renewal among Orthodox believers appeared almost simultaneously in different areas of Eastern Europe at the end of the nineteenth and during the first decades of the twentieth century This volume examines what could be defined as renewal movement in Eastern Orthodox traditions Some case studies include the God Worshippers in Serbia religious fraternities in Bulgaria the Zoe movement in Greece the evangelical movement among Romanian Orthodox believers known as Oastea Domnului The Lord's Army the Doukhobors in Russia and the Maliovantsy in Ukraine This volume provides a new understanding of processes of change in the spiritual landscape of Orthodox Christianity and various influences such as other non Orthodox traditions charismatic leaders new religious practices and rituals

Colossians David J. Landegent, 2017-06-06 Some people can't see the forest for the trees they get so bogged down in details that they lose sight of what it's all about Others can't see the trees for the forest they miss the wondrous details all around them So why not look instead at both the forest and the trees This commentary on Paul's letter to the Colossians guides you in doing just that Even though we will be exploring ancient biblical cultures and learning plenty about the Greek language no prior academic training is needed Technical terms have been set aside Instead with everyday language we will discover the big picture and revel in the fine details of this stunning letter amazed by how God is still speaking these same words today to contemporary personal and social challenges We will not then be tourists rapidly zipping through Colossians as if on a monotonous interstate highway Instead we will be hiking our way through this letter step by step phrase by phrase finding joy in God's truth and growing in our faith Come and join the journey

Divine Science and the Science of God Victor Preller, 2005-05-17 In this book Victor Preller examines the logical status of religious language in the light of recent developments in American analytic philosophy The problem inherent in religious language is presented in terms of the referential status of the word God The author argues that the significance of any referential term is dependent upon the ability of that term to play a significant role within a unified conceptual system The problem is shown to transcend the epistemological dogmas of Positivism and Conceptual Empiricism and to be inherent in any intelligible epistemology including that of Thomas Aquinas whose theological treatises serve as a model of religious language for the thesis of this book According to Professor Preller Divine Science Aquinas term for what we now call Natural Theology results from a reflection upon the limitations encountered by the intellect in its attempt to render intelligible the objects of human experience In the Science of God Aquinas term for that mode of knowing engendered by faith the unknown meta empirical referent of Divine Science becomes the object of the human intellect While this study develops out of the discussions inaugurated by Flew and McIntyre in New Essays in Philosophical Theology it rejects the excessively empirical approach of most other studies in that tradition It applies post positivistic analysis to specifically Catholic theological language but it obviously applies to the theological language involved in any form of theism The Trinity in the Stone-Campbell Movement Kelly D. Carter, 2015-05-10 An assessment of Trinitarian thought in the two hundred year old Stone Campbell Movement including suggestions for ways in which the renewal of Trinitarian doctrine can revitalize the church's life and mission Throughout its history the Stone Campbell Movement has noticeably neglected Trinitarian doctrine prohibiting a biblical understanding of God as Trinity from significantly impacting the movement's churches This book attempts to rectify this weakness in three ways First a focus on the Trinitarian positions of Thomas Campbell Alexander Campbell and Barton W Stone sheds new light on the early shapers of the movement Second the book lays out specific ways in which the movement would benefit by a biblically grounded Trinitarianism and the contributions of contemporary trinitarian theologians And third it presents a plan for the advancement of biblical Trinitarian doctrine among Stone

Campbell churches Significant contributions of this study include the most thorough examination to date of Trinitarian doctrine in Stone Campbell thought an original presentation of the historical theology that stands behind the Trinitarian positions of Thomas Campbell Alexander Campbell and Barton W Stone and a fresh proposal regarding the roots of Barton Stone's quasi Arianism

The Nature of Things Anthony M. Quinton, 2019-03-07 Originally published in 1973 In this systematic treatise Anthony Quinton examines the concept of substance a philosophical refinement of the everyday notion of a thing Four distinct but not unconnected problems about substance are identified what accounts for the individuality of a thing what confers identity on a thing what is the relation between a thing and its appearances and what kind of thing is fundamental in the sense that its existence is logically independent of that of any other kind of thing In Part 1 the first two problems are discussed while in Part 2 the third and fourth are considered Part 3 examines four kinds of thing that have been commonly held to be in some way non material abstract entities the unobservable entities of scientific theory minds and their states and finally values The author argues that theoretical entities and mental states are in fact material He gives a linguistic account of universals and necessary truths and advances a naturalistic theory of value

What is the New Rhetoric? Susan E. Thomas, 2009-03-26 The Age of Information has spawned a critical focus on human communication in a multimedia world particularly on theories and practices of writing With the worldwide web impacting increasingly on academic and business communication the need has never been greater for advanced study in writing communication and critical thinking across all genres sectors and cultures In recent decades the definitions of new rhetoric have expanded to encompass a variety of theories and movements raising the question of how rhetoric is understood and employed in the twenty first century The essays collected here represent variations on these themes with each attempting to answer the title's deliberately provocative question addressing particularly How the classical art of rhetoric is still relevant today How it is directly related to modern technologies and the new modes of communication they have generated How rhetorical practice is informing research methodologies and teaching and learning practices in the contemporary academy
