*A Social History of the American Alligator* Vaughn L. Glasgow, 1991-01-01 Looks at the history and cultural impact of the American alligator and traces early legends      **A Wetland Biography** Gay M. Gomez, 2010-07-05 Louisiana's Chenier Plain is a 2 200 square mile region of marshes and oak covered ridges cheniers that stretches along the Gulf of Mexico from Sabine Lake to Vermilion Bay Its inhabitants some 6 000 people of Cajun and other ancestries retain strong economic and cultural ties to the land and its teeming wildlife They call it paradise but it is a vulnerable paradise In this multifaceted study Gay Gomez explores the interaction of the land people and wildlife of the Chenier Plain revealing both the uniqueness of the region and the challenges it faces After describing the geography and history of the Chenier Plain Gomez turns to the lifeways of its people Drawing on their words and stories she tells how the chenier dwellers combine modern occupations with traditional pursuits such as alligator and waterfowl hunting fur trapping and fishing She shows how these traditions of wildlife use provide both economic incentives for conservation and a source of personal and place identity This portrait of a working wetland reveals how wildlife use and appreciation can give rise to a stewardship that balances biological economic and cultural concerns in species and habitat protection      *Beastly Natures* Dorothee Brantz, 2010-07-08 Jacket

**Environmental Humanities and the Uncanny** Rod Giblett, 2019-04-12 Sigmund Freud's essay The Uncanny is celebrating a century since publication It is arguably his greatest and most fruitful contribution to the study of culture and the environment Environmental Humanities and the Uncanny brings into the open neglected aspects of the uncanny in this famous essay in its centenary year and in the work of those before and after him such as Friedrich Schelling Walter Benjamin E T A Hoffmann and Bram Stoker This book does so by focussing on religion especially at a time and for a world in which some sectors of the monotheisms are in aggressive and sometimes violent contention against those of other monotheisms and even against other sectors within their own monotheism The chapter on Schelling's uncanny argues that monotheisms come out of polytheism and makes the plea for polytheism central to the whole book It enables rethinking the relationships between mythology and monotheistic and polytheistic religions in a culturally and politically liberatory and progressive way Succeeding chapters consider the uncanny cyborg the uncanny and the fictional and the uncanny and the Commonwealth concluding with a chapter on Taoism as a polytheistic religion Building on the author's previous work in Environmental Humanities and Theologies in bringing together theories of religion and the environment this book will be of great interest to students and scholars of the environmental humanities ecocultural studies and religion      **Ain't There No More** Carl A. Brasseaux, Donald W. Davis, 2017-02-06 Winner of the 2018 Louisiana Literary Award given by the Louisiana Library Association For centuries outlanders have openly denigrated Louisiana's coastal wetlands residents and their stubborn refusal to abandon the region's fragile prairies tremblants despite repeated natural and more recently man made disasters Yet the cumulative environmental knowledge these wetlands survivors have gained through painful experiences over the

course of two centuries holds invaluable keys to the successful adaptation of modern coastal communities throughout the globe As Hurricane Sandy recently demonstrated coastal peoples everywhere face rising sea levels disastrous coastal erosion and inevitably difficult lifestyle choices Along the Bayou State s coast the most insidious challenges are man made Since channelization of the Mississippi River in the wake of the 1927 flood which diverted sediments and nutrients from the wetlands coastal Louisiana has lost to erosion subsidence and rising sea levels a land mass roughly twice the size of Connecticut State and national policymakers were unable to reverse this environmental catastrophe until Hurricane Katrina focused a harsh spotlight on the human consequences of eight decades of neglect Yet even today the welfare of Louisiana s coastal plain residents remains at best an afterthought in state and national policy discussions For coastal families the Gulf water lapping at the doorstep makes this morass by no means a scholarly debate over abstract problems Ain t There No More renders an easily read history filled with new insights and possibilities Rare previously unpublished images documenting a disappearing way of life accompany the narrative The authors bring nearly a century of combined experience to distilling research and telling this story in a way invaluable to Louisianans to policymakers and to all those concerned with rising sea levels and seeking a long term solution *Louisiana History* Florence M. Jumonville, 2002-08-30 From the accounts of 18th century travelers to the interpretations of 21st century historians Jumonville lists more than 6 800 books chapters articles theses dissertations and government documents that describe the rich history of America s 18th state Here are references to sources on the Louisiana Purchase the Battle of New Orleans Carnival and Cajuns Less explored topics such as the rebellion of 1768 the changing roles of women and civic development are also covered It is a sweeping guide to the publications that best illuminate the land the people and the multifaceted history of the Pelican State Arranged according to discipline and time period chapters cover such topics as the environment the Civil War and Reconstruction social and cultural history the people of Louisiana local parish and sectional histories and New Orleans It also lists major historical sites and repositories of primary materials As the only comprehensive bibliography of the secondary sources about the state *Louisiana History* R is an invaluable resource for scholars and researchers [Two Months in the Confederate States](#) William Carson Corsan, English merchant, 1996 Corsan visited the Confederacy in the fall of 1862 to judge the impact of the American Civil War on his business s future prospects In a clear lively and at times humorous style Corsan details his experiences which include nearly being drafted into the Rebel army He also records southerners attitudes toward the war **A Case for Solomon** Tal McThenia, Margaret Dunbar Cutright, 2012-08-14 The spellbinding story of one of the most celebrated kidnapping cases in American history the kidnapping of Bobby Dunbar and a haunting family mystery that took almost a century to solve THE MOST NOTORIOUS KIDNAPPING CASE IN AMERICAN HISTORY In 1912 four year old Bobby Dunbar went missing in the Louisiana swamps After an eight month search that electrified the country and destroyed Bobby s parents the boy was found filthy and hardly recogniz able A wandering piano tuner was arrested and charged with

Manno,2017-05-31 Theodore G Manno traces the history of nutria from their natural range in South America to their status as an invasive species known for destroying the environmentally and economically important wetlands along the Gulf Coast In this definitive book on swamp rats Manno vividly recounts western expansion and the explosion of the American fur industry Then he details an apocalyptic turn to replace an overhunted beaver population in North America humans introduced nutria With an eclectic repertoire of true stories that read like fiction and are played out by larger than life characters Manno conveys the legend of empire seeking fur trappers the bizarre miscommunications that led to nutria releases and the sadness that comes with killing millions of nutria whose ancestors were never meant to leave their South American habitat He tells of disastrous interactions among hungry nutria storm surges from Hurricane Katrina and major oil spills His extensively researched and epic narrative accompanied by more than thirty photographs and entertaining interviews with biologists historians fashion designers and chefs weaves a poignant tale of empire conquest fortune and even Tabasco Sauce Manno provides a full overview of what is currently known about nutria a species now aggressively hunted with a bounty program because of their reputation for wetland destruction

**Environmental Humanities and Theologies** Rod Giblett,2018-06-13 Many ways of thinking about and living with the environment have their roots in the Bible and the Christian cultural tradition Environmental Humanities and Theologies shows that some of these ways are problematic It also provides alternative ways that value both materiality and spirituality Beginning with an environmentally friendly reading of the biblical story of creation Environmental Humanities and Theologies goes on to discuss in succeeding chapters the environmental theology of wetlands dragons and watery monsters including crocodiles and alligators in the Bible and literature It then gives a critical reading of the environmental theology of the biblical book of Psalms Theological concepts are found in the works of English writers of detective and devotional stories and novels American nature writers and European Jewish writers as succeeding chapters show Environmental Humanities and Theologies concludes with an appreciation for Australian Aboriginal spirituality in the swamp serpent It argues for the sacrality of marsh monsters and swamp serpents as figures of reverence and respect for living bio and psycho symbiotic livelihoods in bioregions of the living earth in the Symbiocene This is the hoped for age superseding the Anthropocene Environmental Humanities and Theologies is aimed at those who have little or no knowledge of how theology underlies much thinking and writing about the environment and who are looking for ways of thinking about being and living with the earth that respect and value both spirituality and materiality It is a new text nurturing sacrality for the Symbiocene

**Nature's Ghosts** Mark V. Barrow,2011-04-15 The rapid growth of the American environmental movement in recent decades obscures

the fact that long before the first Earth Day and the passage of the Endangered Species Act naturalists and concerned citizens recognized and worried about the problem of human caused extinction As Mark V Barrow reveals in *Nature's Ghosts* the threat of species loss has haunted Americans since the early days of the republic From Thomas Jefferson's day when the fossil remains of such fantastic lost animals as the mastodon and the woolly mammoth were first reconstructed through the pioneering conservation efforts of early naturalists like John James Audubon and John Muir Barrow shows how Americans came to understand that it was not only possible for entire species to die out but that humans themselves could be responsible for their extinction With the destruction of the passenger pigeon and the precipitous decline of the bison professional scientists and wildlife enthusiasts alike began to understand that even very common species were not safe from the juggernaut of modern industrial society That realization spawned public education and legislative campaigns that laid the foundation for the modern environmental movement and the preservation of such iconic creatures as the bald eagle the California condor and the whooping crane A sweeping beautifully illustrated historical narrative that unites the fascinating stories of endangered animals and the dedicated individuals who have studied and struggled to protect them *Nature's Ghosts* offers an unprecedented view of what we've lost and a stark reminder of the hard work of preservation still ahead
