Annual Review of Gerontology and Geriatrics, Volume 14, 1994 M. Powell Lawton, PhD, Jeanne A. Teresi, EdD, PhD, 1994-10-30

This volume evaluates a range of assessment measures with regard to older adults. The expert contributors address topics such as assessment of health functional disability, ADLs, mental agility, aging and personality, depression and pain. While the instruments themselves are readily available from other sources, this book discusses the suitability, strengths and weaknesses of various measures and offers current information on the rapidly changing state of the art assessment technology.

The Handbook of the Study of Play James E. Johnson, Scott G. Eberle, Thomas S. Henricks, David Kuschner, 2015-02-05

The Handbook of the Study of Play brings together in two volumes thinkers whose diverse interests at the leading edge of scholarship and practice define the current field. Because play is an activity that humans have shared across time, place and culture and in their personal developmental timelines and because this behavior stretches deep into the evolutionary past, no single discipline can lay claim to exclusive rights to study the subject. Thus, this handbook features the thinking of evolutionary psychologists, ethologists and biologists, neuroscientists, developmental psychologists, psychotherapists and play therapists, historians, sociologists and anthropologists, cultural psychologists, philosophers, theorists of music performance and dance, specialists in learning and language acquisition and playground designers. Together, but out of their varied understandings, the incisive contributions to The Handbook take on vital questions of educational policy, of literacy, of fitness, of the role of play in brain development, of spontaneity and pleasure, of well-being and happiness, of fairness and of the fuller realization of the self. These volumes also comprise an intellectual history. Retrospectively, it looks at the great thinkers who have made possible the modern study of play.

A Decade of Change and Continuity in Midlife Gaylene Carpenter, Jean Stockard, 2020-06-23

Each year for ten uninterrupted years a group of middle-aged adults told researchers about their wants and desires, their life stresses and strains, their sources of happiness

and joy and their perspectives on how their lives were or were not changing This book summarizes the results of this unique and unprecedented study Using extensive statistical analyses and qualitative case studies it documents change and consistency in participants core values and perceptions of leisure It describes the vast range of experiences people had each year in areas ranging from changing social relationships to employment and health and examines how these experiences affected their lives and their views of their life structure looking at both variations over time for individual participants and differences from one participant to another This book provides important guidance for scholars and researchers of aging It also offers fascinating insights for practitioners working with midlife and older adults as well as for the reader anticipating or experiencing the midlife years

The Sociology of Tourism Yiorgos Apostolopoulos, Stella Leivadi, Andrew Yiannakis, 2013-04-15 The rapid expansion of the tourism industry has provided many economic benefits and affected every facet of contemporary societies including employment government revenue and cultural manifestations However tourism can also be considered a problematic phenomenon promoting dependency underdevelopment and adverse sociocultural effects especially for developing countries This pioneering work provides a comprehensive review of these complex tourism issues from a sociological perspective Various theoretical and empirical approaches are introduced and the following issues are discussed identifiable and stable forms of touristic behaviour and roles social divisions within tourism the interdependence of tourism and social institutions the effects of transnational tourism and commodification on the ecosystem Featuring international contributions from nine different countries this book brings together the most noted theoretical and empirical studies and enriches them with diverse experiences and perspectives

A New Research Agenda for Improvements in Quality of Life Filomena Maggino, 2015-04-10 This book presents a new research agenda for improvements in Quality of Life research It includes topics such as Studying QoL in particular subpopulations and selected subgroups Disentangling the difficult task of identifying determinants of QoL Perfectionating the measurement of conceptual dimensions Defining new indicators able to measure and monitor particular social conditions and shows that these are not separated fields of studies but intersect each other and produce different outcomes which can be with difficulty classifiable consistent with the idea of the complexity of our reality The volume presents micro perspectives by taking into account the macro situation through both qualitative and quantitative approaches

Work, Leisure and Well-Being John T Haworth, 2006-04-19 Although it is now well established that unemployment is detrimental to health and well being most of us assume that a well structured rewarding leisure activity would be preferable to paid work John Haworth challenges these assumptions and shows that the very constriction of work like having to perform a task we wouldn't otherwise choose are often the most rewarding in the end Work Leisure and Well Being reviews the current literature and complements it with the findings of the most recent research to provide a serious and fascinating study of the most important areas of adult life It raises as many questions as it answers for instance if paid work is better than a leisure activity what's the use of looking forward to retirement Work Leisure and

Functional Performance in Older Adults Bette R Bonder, Vanina Dal Bello-Haas, 2008-10-31

The ideal resource for rehabilitation professionals who are working with or preparing to work with older adults It describes the normal aging process illustrates how health and social factors can impede an aging person's abilities and demonstrates how to develop mechanisms for maximizing the well being of older adults

Dimensions of Well-being Antonella Delle Fave, 2006

Applications of Flow in Human Development and Education Mihaly Csikszentmihalyi, 2014-08-08

The third volume of the collected works of Mihaly Csikszentmihalyi covers his work on the application of flow in areas that go beyond the field of leisure where the concept was first applied Based on his personal experience with schooling and learning as well as that of many others and contrary to what Cicero claimed Csikszentmihalyi arrived at the conclusion that instead of taking pride in making the roots of knowledge as bitter as possible we should try to make them sweeter Just as flow became a popular and useful concept in voluntary activities it could likewise be applied in education with the end result of young people being more likely to continue learning not just because they have to but because they want to This volume brings together a number of articles in which

Csikszentmihalyi develops ideas about how to make education and more generally the process of learning to live a good life more enjoyable Since theory is the mother of good practice the first eleven chapters are devoted to theoretical reflections Some are general and explore what it means to be a human being what it means to be a person when we look at life from the perspective of flow Others are more narrowly focused on such topics as consumption education teaching and learning They help laypeople reflect how they can arrange their lives in such a way as to leave a small ecological footprint while getting the most enjoyment The second section of the volume contains a dozen empirical articles on similar topics They deal with the development of identity and self worth with the formation of goals and motivation with loneliness and family life

Adults With Disabilities Paul Retish, Shunit Reiter, 1999-05-01 This book concerns the process of transition that we all make throughout our lifetime and the necessary skills individuals with disabilities need to function outside of school The book illustrates that the problems of transition are not just for persons with disabilities but for everyone Acceptance of differences understanding that our perceptions may not be accurate and the ability to be honest with one another are shown to be key elements in assisting transition
