

# SOCIAL STRUCTURES

social structures in sociology are the relationships or interactions between groups of different people in a society.

## IN SOCIOLOGICAL ANALYSIS

The analysis of social structures often occurs on three levels:

1. **Macro analysis** – looks at broad categories and systems like large populations and groups like entire countries or economic systems.
2. **Meso analysis** – studies communities or certain groups in a society.
3. **Micro analysis** – observes patterns and collects data from smaller groups like families, or individuals (DeCarlo, 2018).

## EXAMPLES

- 1 Nations
- 2 Economies
- 3 Racial groups
- 4 Religions
- 5 Legal systems
- 6 Political parties

**Handbook on Social Structure of Accumulation Theory** McDonough, Terrence,McMahon, Cian,Kotz, David M.,2021-12-07 This pioneering Handbook offers a state of the art exploration of the social structure of accumulation theory a leading theory of stages of capitalism expertly summarising its development to date It breaks new ground in several areas including econometric evidence for the theory and developing institutional analyses of technology and the environment

Social Structure Charles Crothers,2013-12-16 Crothers s book provides a thorough introduction to the idea of social structure He examines the meanings of the term the history of its usage within sociology and looks at the more recent developments in thinking on social structure      **Social Structures** John Levi Martin,2009-07-27 Social Structures is a book that examines how structural forms spontaneously arise from social relationships Offering major insights into the building blocks of social life it identifies which locally emergent structures have the capacity to grow into larger ones and shows how structural tendencies associated with smaller structures shape and constrain patterns of larger structures The book then investigates the role such structures have played in the emergence of the modern nation state Bringing together the latest findings in sociology anthropology political science and history John Levi Martin traces how sets of interpersonal relationships become ordered in different ways to form structures He looks at a range of social structures from smaller ones like families and street gangs to larger ones such as communes and ultimately nation states He finds that the relationships best suited to forming larger structures are those that thrive in conditions of inequality that are incomplete and as sparse as possible and thereby avoid the problem of completion in which interacting members are required to establish too many relationships and that abhor transitivity rather than assuming it Social Structures argues that these patronage relationships which often serve as means of loose coordination in the absence of strong states are nevertheless the scaffolding of the social structures most distinctive to the modern state namely the command army and the political party      *Government-supported Research International Affairs; Research Completed and in Progress July 1969-June 1970* Allan E. Suchinsky,United States State Government,1971 The document describes current research projects those initiated in progress and completed during fiscal year 1970 in the social and behavioral sciences dealing with international affairs foreign areas and United States foreign policy for the use primarily of research officers throughout the Government The research descriptions are arranged by subject matter with cross references as appropriate at the end of each section Author      Social And Political Structures In West Germany Ursula Hoffmann-lange,Peter Jelavich,Robert Rickards,Lewis J Edinger,2019-05-28 This book offers a view of West German social structure and political culture from a multidisciplinary perspective Focusing on the remarkable changes that have taken place in West Germany since World War II it provides a basis for judging what direction a united Germany is likely to take      *Social Structures* Barry Wellman,S. D. Berkowitz,1988-01-29 This study of social structures looks at the network approach It contains non technical articles that contrast structural analysis with other social scientific

approaches It deals with individual behaviour and identity and with neighbourhood and community ties It examines the relationships within and between organizations discussing how firms occupy strategically appropriate niches It also explores the impact of the growth of the Internet equating computer networks as social networks connecting people in virtual communities and collaborative work

*Time and Social Structure and Other Essays* Meyere Fortes, 2021-01-14 The papers reprinted in this volume have been selected with two considerations in mind they record ethnographical observations from my field work among the Tallensi and in Ashanti that are not easily accessible elsewhere but continue to be useful for comparative studies and as background to current research in Ghana and they represent applications of methods of analysis and schemes of interpretation that were emerging in British structural anthropology at the time of their publication The Monographs on Social Anthropology were established in 1940 and aim to publish results of modern anthropological research of primary interest to specialists

**Anthropology and Political Science** Myron J. Aronoff, Jan Kubik, 2013 What can anthropology and political science learn from each other The authors argue that collaboration particularly in the area of concepts and methodologies is tremendously beneficial for both disciplines though they also deal with some troubling aspects of the relationship Focusing on the influence of anthropology on political science the book examines the basic assumptions the practitioners of each discipline make about the nature of social and political reality compares some of the key concepts each field employs and provides an extensive review of the basic methods of research that bridge both disciplines ethnography and case study Through ethnography participant observation reliance on extended case studies and the use of anthropological concepts and sensibilities a greater understanding of some of the most challenging issues of the day can be gained For example political anthropology challenges the illusion of the autonomy of the political assumed by political science to characterize so called modern societies Several chapters include a cross disciplinary analysis of key concepts and issues political culture political ritual the politics of collective identity democratization in divided societies conflict resolution civil society and the politics of post Communist transformations

**The Causal Power of Social Structures** Dave Elder-Vass, 2010-06-17 The problem of structure and agency has been the subject of intense debate in the social sciences for over 100 years This book offers a solution Using a critical realist version of the theory of emergence Dave Elder Vass argues that instead of ascribing causal significance to an abstract notion of social structure or a monolithic concept of society we must recognise that it is specific groups of people that have social structural power Some of these groups are entities with emergent causal powers distinct from those of human individuals Yet these powers also depend on the contributions of human individuals and this book examines the mechanisms through which interactions between human individuals generate the causal powers of some types of social structures The Causal Power of Social Structures makes particularly important contributions to the theory of human agency and to our understanding of normative institutions

*Research Methods in Politics* Wyn Grant, 2008-06-17 The second edition of this popular text provides a comprehensive introduction to the main

research methods employed in the study of politics and assessment of their strengths and limitations and of ethical issues in research It has been revised and updated throughout and a new chapter considers the relationship between research and policy

*Inequality, Socio-cultural Differentiation and Social Structures in Africa* Dieter Neubert, 2019-06-25 This book contends that conventional class concepts are not able to adequately capture social inequality and socio cultural differentiation in Africa Earlier empirical findings concerning ethnicity neo traditional authorities patron client relations lifestyles gender social networks informal social security and even the older debate on class in Africa have provided evidence that class concepts do not apply yet these findings have mostly been ignored For an analysis of the social structures and persisting extreme inequality in African societies and in other societies of the world we need to go beyond class consider the empirical realities and provincialise our conventional theories This book develops a new framework for the analysis of social structure based on empirical findings and more nuanced approaches including livelihood analysis and intersectionality and will be useful for students and scholars in African studies and development studies sociology social anthropology political science and geography

*Irish Political Studies Reader* Conor McGrath, Eoin O'Malley, 2007-10-18 This is an introduction to the best available scholarship within Irish politics featuring the most influential and significant articles which have been published on Irish politics during the past twenty years Each article is accompanied by a new commentary by another leading scholar which addresses the impact and contribution of the article and discusses how its themes remain crucial today The book covers all the most important topics within Irish politics including political culture and traditions political institutions and parties and the peace process The combination of the best original scholarship and contemporary commentaries on the core political issues makes *Irish Political Studies Reader* an invaluable resource for all students and scholars of Irish politics

*Land, Water, Language and Politics in Andhra* Brian Stoddart, 2014-03-14 This book explains how access to and use of land water and language helped shape Andhra politics in India from 1850 down to the present day After independence the debate over land reform and policies on irrigation has shaped the fortunes of various governments while the debate over the make up of the language based state has stimulated separatist movements like the one in support of Telangana The book discusses how British innovations in irrigation in coastal Andhra in the mid nineteenth century transformed the economy there from food crops to cash crops and created new markets for local entrepreneurs This stimulated increased education and social reform in the region which in turn supported new politics in search of constitutional concessions The drive for a Telugu language based province then arose in concert and those political resources were then used to determine local patterns down to independence The 1930s rise of the socialists then the communist organisations was an extension of land and water tax debates which impacted the political nature of development both before and after independence This is one of the first books on Andhra that recounts this story and is

based on extensive archival research exploring the deep relationships between land water language and politics It would be of primary interest to those studying modern nationalism in India natural resource management Indian politics and economic growth

**Political Economy of Labour, Income Distribution & Exclusion** Christos Papatheodorou,Savaş Çevik,Dimitris Paitaridis,Güneş Yılmaz,2018-12-15 This volume includes 11 chapters based on papers presented at the 9th International Conference of Political Economy ICOPEC 2018 that was co organised by the Greek Association for Political Economy the Department of Social Policy of Panteion University and the Faculty of Economics of Marmara University Chapters adopt a political economy approach to discuss and analyse crucial issues linked to social and economic inequalities poverty and deprivation as well as to labour market changes These are issues which are greatly affected by the recent economic crisis and by the neoliberal policies for fiscal discipline reduce of public spending and labour market deregulation that were implemented to most countries and particularly to those where the consequences of the crisis were more severe

*External Research* United States. Department of State. External Research Division, *Social Structure and Mobility in Economic Development* Seymour Lipset,2018-04-27 The foundation of this volume is the notion that the several processes of change constituting economic and social development are systematically interrelated The essence of development is the appearance of rapid rates of increases in many different indices output per capita political participation literacy and the like These quantitative changes are however commonly accompanied by vast changes in the social structure markets emerge political bureaucracies arise and new educational systems appear Written by the leading authorities on the subject this group of papers tackles the causes and consequences of social mobility Each author brings his particular skills to bear on various aspects of the problem in studies of persons moving from rural to urban settings from one kind of industry to another and from one prestige level to another Several of the papers review the theoretical and methodological issues involved in comparative research on social mobility while others compare and contrast traditional and modern stratification systems Various papers explore the economic religious and psychological basis of social mobility concluding with enquiry into the consequences of rapid mobility especially in terms of the political stability of developing nations Because social mobility is a central consideration in any study of economic and social change every student of change will use this pioneering reference source as a text for all future research Contributors include Otis Dudley Duncan Harold L Wilensky Michael G Smith Bert F Hoselitz Wilbert E Moore Natalie Rogoff Rams y Gideon Sjoberg Reinhard Bendix Harry Crockett David Matza Lester Seligman and Gino Germani Neil J Smelser is emeritus professor Department of Sociology University of California Berkeley Seymour Martin Lipset was professor of sociology and director of the Institute of International Studies at the University of California Berkeley

*Religious Voting in Western Democracies* José Ramón Montero,Paolo Segatti,Kerman Calvo,2023-06-14 This

book offers a systematic exploration of the role of religion and religiosity in electoral politics in Catholic Protestant and religiously mixed countries across Western Europe and in the United States The chapters approach the relationship between religion religiosity and electoral behaviour from a variety of different angles They include analyses of secularization trends comparative studies of the links between vote choice and religiosity longitudinal single country studies and a novel discussion of the theoretical underpinnings of the politicization of religion that provides a radically new framework for the analysis of the role of religiosity in election studies The volume shows that despite the expectations of secularization theory religiosity remains relevant when casting votes It also argues that the traditional notion of religious cleavage should be replaced with the more accurate idea of religious voting Chapters draw on National Election Studies data and comparative datasets such as European Values Studies EVS European Social Surveys ESS and European Election Studies EES to empirically test expectations regarding religious voting The results show that variations in religious voting are conditional on both the agency of political and ecclesiastical leaders when politicizing religious issues and the legacies of previous societal and political religious conflicts regardless of whether the original party system had a predominant religious cleavage
