Social Dynamics Of Adolescent Fertility In Sub Saharan Africa:

Social Dynamics of Adolescent Fertility in Sub-Saharan Africa National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Working Group on the Social Dynamics of Adolescent Fertility, 1993-02-01 This examination of changes in adolescent fertility emphasizes the changing social context within which adolescent childbearing takes place **Social Dynamics of Adolescent Fertility in Sub-Saharan Africa** Caroline H. Bledsoe, Barney Cohen, 1993-01-15 Adolescent fertility tends to be valued and sanctioned in the countries of sub Saharan Africa when parents have had adequate ritual or training preparation for adulthood and the child has a recognized father Young women and adolescents who conceive and bear children within this context are widely accepted by society those who conceive outside of marriage however are strongly condemned by society Over the past 2 3 decades most African countries have successfully raised their levels of education Girls and women are increasingly privy to formal school education and training in trade apprenticeships domestic service and ritual initiation which had otherwise been denied in the past These factors combined with declining menarche in a few areas and changing economic opportunities law and religion make it more difficult to define the exact date of entry into marriage Many girls are taking advantage of these changing circumstances and their opportunities to obtain educations and resist early marriage and childbearing While defying the traditional entry into early marriage many young women do not however refrain from engaging in sexual activities Pregnancies to unwed mothers are thereby on the rise and may constitute the most profound change observed in the social context of adolescent fertility on the continent Once pregnant many women find themselves shut out by family planning programs and prenatal clinics which serve only married women This paper ultimately concludes that the social context of adolescent childbearing has an effect on the outcome for mother and child which is as important as the physiological maturity of the mother **Fertility, Mortality and Migration in Sub-Saharan Africa** V. Siiskonen, 2016-06-08 In north Namibia the availability of continuous series of parish record data since the 1920s offer excellent possibilities to study population development on a regional level by primary sources In this study fertility mortality and internal migration in north Namibia among the Christian population since the mid 1920s to the 1990s is analyzed **Factors Affecting Contraceptive Use in Sub-Saharan Africa** National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Working Group on Factors Affecting Contraceptive Use, 1993-02-01 This book discusses current trends in contraceptive use socioeconomic and program variables that affect the demand for and supply of children and the relationship of increased contraceptive use to recent fertility declines **Trends in Adolescent Fertility and Contraceptive Use in the Developing World** Thomas M. MacDevitt, Arjun Adlakha, Timothy B. Fowler, Vera Harris-Bourne, 1996 **Family Demography and Post-2015 Development Agenda in Africa** Clifford O. Odimegwu, 2019-08-27 This book is a comprehensive analysis of the structure determinants and consequences of changes in

Fertility, Conjunction, Difference Philip Kreager, Astrid Bochow, 2017-09-01. In the last forty years, anthropologists have made major contributions to understanding the heterogeneity of reproductive trends and processes underlying them. Fertility transition, rather than the story of the triumphant spread of Western birth control, rationality reveals a diversity of reproductive means and ends, continuing before, during and after transition. This collection brings together anthropological case studies, placing them in a comparative framework of compositional demography and conjunctural action. The volume addresses major issues of inequality and distribution which shape population and social structures and in which fertility trends and the formation and size of families are not decided solely or primarily by reproduction. **Contingent Lives** Caroline H. Bledsoe, 2010-11-15. Most women in the West use contraceptives in order to avoid having children. But in rural Gambia and other parts of sub-Saharan Africa, many women use contraceptives for the opposite reason: to have as many children as possible. Using ethnographic and demographic data from a three-year study in rural Gambia, *Contingent Lives* explains this seemingly counterintuitive fact by juxtaposing two very different understandings of the life course: one is a linear Western model that equates aging and the ability to reproduce with the passage of time; the other is a Gambian model that views aging as contingent on the cumulative physical, social and spiritual hardships of personal history, especially obstetric trauma. Viewing each of these two models from the perspective of the other, Caroline Bledsoe produces fresh understandings of the classical anthropological subjects of reproduction, time and aging as culturally shaped within women's conjugal lives. Her insights will be welcomed by scholars of anthropology and demography as well as by those working in public health development studies.

 Thomas M. McDevitt, Arjun Adlakha, Vera Harris-Bourne, Timothy B. Fowler, 1996 **In Her Lifetime** Institute of
 Medicine, Committee to Study Female Morbidity and Mortality in Sub-Saharan Africa, 1996-04-06 The relative lack of
 information on determinants of disease disability and death at major stages of a woman's lifespan and the excess morbidity
 and premature mortality that this engenders has important adverse social and economic ramifications not only for Sub
 Saharan Africa but also for other regions of the world as well Women bear much of the weight of world production in both
 traditional and modern industries In Sub Saharan Africa for example women contribute approximately 60 to 80 percent of
 agricultural labor Worldwide it is estimated that women are the sole supporters in 18 to 30 percent of all families and that
 their financial contribution in the remainder of families is substantial and often crucial This book provides a solid
 documentary base that can be used to develop an agenda to guide research and health policy formulation on female health
 both for Sub Saharan Africa and for other regions of the developing world This book could also help facilitate ongoing
 collaboration between African researchers on women's health and their U S colleagues Chapters cover such topics as
