The Global and the Local Arndt Sorge, 2005-03-17 there is no lack of ambition in this book And yet unlike much of what today comes as sociology it is fun to read written in a way that combines the very abstract and the very concrete the principles of general theories and the anecdotes of specific histories in ways that are enlightening and entertaining at the same time Those who take the book to heart will find themselves in possession of a language that can speak about globalization in a non sensationalist manner without however in any way detracting from its significance in fact quite to the contrary They will much better and more systematically understand the lasting significance of the local in a

world whose horizons of action are expanding From the Foreword by Wolfgang Streeck Max Planck Institute for the Study of Societies Cologne The rhetoric of internationalization and globalization often suggests an inexorable move away from domestic cultural and institutional differences Yet the development of internationalization within individual nations has been shaped by those very domestic institutions and cultures as best practice or other kinds of international learning have been translated into established practice and knowledge In this important study Arndt Sorge presents a sociological theory of the development of human societies to explain how business systems evolve and change and how internationalization works to specify and change societal identities within nations Examining changes in work organization corporate governance and human resources Sorge shows how this interaction is a pattern that has been followed over centuries Indeed amongst the cases Sorge presents he concentrates on the example of Germany a supposedly highly homogeneous and closed society as evidence for the universality of shifting borders expanding horizons local adoption and adaptation of global practices and the hybridization of systems and standards as the normal course of social evolution Arndt Sorge s analysis of globalization combines rigorous theoretical reasoning with empirically grounded analysis and deliberately adopts a general social science approach drawing on research from Business and Management Studies Sociology Political Science and History
