Imitation and Social Learning in Robots, Humans and Animals Chrystopher L. Nehaniv, Kerstin Dautenhahn, 2009-04-09 Mechanisms of imitation and social matching play a fundamental role in development communication interaction learning and culture Their investigation in different agents animals humans and robots has significantly influenced our understanding of the nature and origins of social intelligence Whilst such issues have traditionally been studied in areas such as psychology biology and ethnology it has become increasingly recognised that a constructive approach towards imitation and social learning via the synthesis of artificial agents can provide important insights into mechanisms and create artefacts that can be instructed and taught by imitation demonstration and social interaction rather than by explicit programming This book studies increasingly sophisticated models and mechanisms of social matching behaviour and marks an important step towards the development of an interdisciplinary research field consolidating and providing a valuable reference for the increasing number of researchers in the field of imitation and social learning in robots humans and animals

Handbook on Crime and Deviance Marvin D. Krohn, Alan J. Lizotte, Gina Penly Hall, 2010-01-15 **Bounded Rationality** Gerd Gigerenzer, Reinhard Selten, 2002-07-26 In a complex and uncertain world humans and animals make decisions under the constraints of limited knowledge resources and time Yet models of rational decision making in economics cognitive science biology and other fields largely ignore these real constraints and instead assume agents with perfect information and unlimited time About forty years ago Herbert Simon challenged this view with his notion of bounded rationality Today bounded rationality has become a fashionable term used for disparate views of reasoning This book promotes bounded rationality as the key to understanding how real people make decisions Using the concept of an adaptive toolbox a repertoire of fast and frugal rules for decision making under uncertainty it attempts to impose more order and coherence on the idea of bounded rationality The contributors view bounded rationality neither as optimization under constraints nor as the study of people's reasoning

fallacies The strategies in the adaptive toolbox dispense with optimization and for the most part with calculations of probabilities and utilities The book extends the concept of bounded rationality from cognitive tools to emotions it analyzes social norms imitation and other cultural tools as rational strategies and it shows how smart heuristics can exploit the structure of environments The Corsini Encyclopedia of Psychology and Behavioral Science, Volume 4 W. Edward Craighead, Charles B. Nemeroff, 2002-11-11 A complete reference to the fields of psychology and behavioral science Volume 4 is the final volume in The Corsini Encyclopedia of Psychology and Behavioral Science series Providing psychologists teachers researchers and students with complete reference for over 1 200 topics across four volumes this resource is invaluable for both clinical and research settings Coverage includes conditions assessments scales diagnoses treatments and more including biographies on psychologists of note and psychological organizations from across the globe The Third Edition has been updated to reflect the growing impact of neuroscience and biomedical research providing a highly relevant reference for the highest standard of care *A Level Psychology Through Diagrams* Grahame Hill, 2001 DT These highly successful revision guides have been brought right up to date for the new A Level specifications introduced in September 2000 DT Oxford Revision Guides are highly effective for both individual revision and classroom summary work The unique visual format makes the key concepts and processes and the links between them easier to memorize DT Students will save valuable revision time by using these notes instead of condensing their own DT In fact many students are choosing to buy their own copies so that they can colour code or highlight them as they might do with their own revision notes *Cognitive Gadgets* Cecilia Heyes, 2018-04-16 Adult humans have impressive pieces of cognitive equipment but in Cecilia Heyes's view these cognitive gadgets are not programmed in the genes They are constructed over the course of childhood through social interaction From birth our malleable minds learn from our culture soaked human environment not only what to think but how to think it **Animal Cognition** Clive D.L.
