The State of State Theory Davita Silfen Glasberg, Abbey S. Willis, Deric Shannon, 2017-12-21 In *The State of State Theory* State Projects Repression and Multi Sites of Power Glasberg Willis and Shannon argue that state theories should be amended to account both for theoretical developments broadly in the contemporary period as well as the multiple sites of power along which the state governs Using state projects and policies around political economy sexuality and family food welfare policy racial formation and social movements as narrative accounts in how the state operates the authors argue for a complex and intersectional approach to state theory In doing so they expand outside of the canon to engage with perspectives within critical race theory queer theory and beyond to build theoretical tools for a contemporary and critical state theory capable of providing the foundations for understanding how the state governs what is at stake in its governance and importantly how people resist and engage with state power

African Womanhood and the Feminist Agenda Musingafi, Maxwell Constantine Chando, Hungwe, Chipso, 2024-01-16 Within academic circles there is a longstanding issue concerning the portrayal and understanding of African womanhood Frequently these narratives are crafted by outsiders predominantly Western scholars often distorting the lived experiences and unique perspectives of African women This has led to a skewed and sometimes negative perception of African women reinforcing stereotypes and sidelining their voices in critical discussions Moreover this misrepresentation has real world consequences as it impacts social justice initiatives and development projects that rely on misguided narratives rather than the authentic voices of African women *African Womanhood and the Feminist Agenda* emerges as an essential solution to the misrepresentation of African women This comprehensive and meticulously researched book offers an alternative narrative one that is rooted in African perspectives and experiences It addresses the historical cultural and political dimensions of African womanhood providing a rich and nuanced understanding of this multifaceted topic

A forceful critique of the social science that has ruled and damaged the modern world The practice of economics as economists will tell you is a powerful force for good Economists are the guardians of the world s economies and financial systems The applications of economic theory can alleviate poverty reduce disease and promote sustainability While this narrative has been successfully propagated by economists it belies a more challenging truth economic interventions including those economists deem successful also cause harm Sometimes the harm is manageable and short lived But just as often the harm is deep enduring and even irreparable And too often the harm falls on those least able to survive it In The Tragic Science George F DeMartino says what economists have too long repressed that economists do great harm even as they aspire to do good Economist induced harm DeMartino shows results in part from economists irreparable ignorance from the fact that they know far less than they tend to believe they know and from disciplinary training that treats the human tolls of economic policies and interventions as simply the costs of promoting social betterment DeMartino details the complicated nature of economic harm explores economists frequent failure to recognize it and makes a sobering case for professional humility and for genuine respect for those who stand to be harmed by economists practice At a moment in history when the economics profession holds enormous power DeMartino s work demonstrates the downside of its influence and the responsibility facing those who practice the tragic science Learning Languages, Learning Life Skills Riitta Jaatinen,2007-01-10
