International Perspectives on Social Work in Health Care Gail K Auslander, 2014-02-04 In the new health care environment, social workers are being called upon to act as case managers, coordinators, evaluators, therapists, and researchers. *International Perspectives on Social Work in Health Care* brings together academics and practitioners to discuss what managed care, cost containment, corporatization, and pre-

payment portend for social work's survival. Its explanatory pages will help you understand the need for skills in networking, mediation and advocacy; how to link communities and institutions; and how to conceptualize, quantify and measure the outcomes of social work interventions. In an effort to transcend traditional organizational and intellectual boundaries, *International Perspectives on Social Work in Health Care* explores conflicts inherent to social work, the need for new theoretical and practice models, social work administration in changing health care organizations, and developments in health social work research. Seeking to unite policy and practice, this guidebook addresses key issues, trends and innovations in social work, including services that enhance community health, the transformation of health care in the U.S. into a market commodity, a broader approach to health and health care to correct gender biases, lifestyle changes and health promotion, helping clients overcome patterns of denial, fear and anger, individual casework vs. group/community practice, patterns of social work service provision in a rehabilitation hospital environment, the effects of heterosexism on health and mental health services to lesbian and gay clients. *International Perspectives on Social Work in Health Care* acts as a forum for contributing authors and readers to exchange and gain information and learn from each other's experiences and expertise. This is the book to help social work academics, educators and practitioners work together to meet the demands and challenges of the increasingly complex health care environment.

Professional Social Work Education and Health Care responds to critical concerns about the educational preparation of social workers within the rapidly changing health care environment. Contributors address issues and questions of importance to educators who are contending with the multiple challenges of rapidly changing institutions, fiscal constraints, and service to populations with complex social health care needs. This coverage provides you with important visions of the future education of leaders in health care social work. The editors of Professional Social Work Education and Health Care present information that looks to the future in order to open the floor for communication among the leaders in health care social work settings. Chapters explain the context of social work practice, explore current social work practice issues, and look into continuing education and fieldwork. In doing so, they give you valuable information about important issues such as changes in social work department structure and function in challenging economic times, collaborative efforts and reciprocal relationships in education and training, emergence of networks that will join forces with hospitals, preparation for short-term solution-based social work, the remaining need for traditional long-term social work frameworks and values, the shift in ideology to viewing clients as consumers rather than patients, modification of curriculum to focus on parenting, health education, adolescent pregnancy prevention, and wellness programs, emergence of a model for post-master's education, field work in community-based health care placements versus inpatient hospital settings. This book's model for making education and practice responsive to each other and for responding to the needs for collaboration makes it a valuable resource for social work educators, practitioners, and clinicians in health and mental health, advanced gerontologists in academic and practice agencies, and teachers of policy and research in health concentrations in schools of social work.
