Cover to Cover Novel *Focus, 2nd Edition* Mike Schmoker, 2018-07-16 In this 2nd edition of *Focus* Elevating the Essentials to Radically Improve Student Learning Mike Schmoker extends and updates the case that our schools could be on the cusp of swift unparalleled improvements But we are stymied by a systemwide failure to simplify and prioritize we have yet to focus our limited time and energy on the most essential widely acknowledged evidence based practices that could have more impact than all other initiatives combined They are simple coherent curricula straightforward traditional literacy practices and lessons built around just a few hugely effective elements of good teaching As Schmoker demonstrates the case for these practices and the need for them has grown prodigiously In every chapter you ll find late breaking discoveries and practical advice on how to simplify the implementation of new state standards in the subject areas on the hidden pitfalls of our most popular but unproven instructional fads and programs and on simple versatile strategies for building curriculum planning lessons and integrating literacy into every discipline All of these strategies and findings are supported with exciting new evidence from actual schools Their success confirms as Michael Fullan writes that a focus on the best high leverage practices won t only improve student performance they will produce stunningly powerful consequences in our schools

Focus Michael J. Schmoker, 2011 The introduction states T he only reason our schools haven t made astonishing progress in the last 30 years of reform is quite simple very few schools ever implemented what is essential the most powerful simple actions and structures that would dramatically increase the proportion of students prepared for college or careers What is essential for schools Three simple things reasonably coherent curriculum what we teach sound lessons how we teach and far more purposeful reading and writing in every discipline or authentic literacy integral to both what and how we teach

Critical Education Against Global Capitalism Paula Allman, 2001-04-30 In today s vernacular Marx outed capitalism well over a century ago but his explanation has been both ignored and misinterpreted by not only his detractors but also by many socialists and even a considerable number of Marxists as well Today we are experiencing the full impact and suffering the repercussions of capitalism s inherent need to become more than ever before a fully internationalized and integrated system of socio economic control and domination the global

system that many commentators have suddenly remembered Marx and Engels 1848 presciently forecasted in the Communist Manifesto When the Berlin Wall fell in 1989 the victory of capitalism and liberal democracy was triumphantly proclaimed The Cold War was over and we were promised a lasting peace But as we enter the third millennium we are facing escalating social divisions injustice and oppression with an environment in varying stages of ecological decay Daily we are bombarded by the schizoid media images of capitalism s extremes on television news the ravaged faces and wasted bodies of some of the thousands suffering famine or the millions living in the world s slums and then the gleaming yet vacuous smile and sumptuously adorned figure of some extravagant wealthy individual who is one of the select members of the global upper class Are we becoming conditioned to accept such contrasts and regard them as normal and inevitable at a time when we have the potential to eliminate scarcity and eradicate human deprivation The author argues that critical education is needed to form a movement capable of challenging and then transforming capitalism She also offers an accessible account of Marx s dialectical critique and expos of capitalism clearly demonstrating the real enemy that should be the focus of anti capitalist and anti globalization struggles This is an account that explains why our main focus should not be on greedy individual capitalists or particular multinational corporations or even their handmaiden institutions such as the World Bank IMF WTO etc but instead the global network of capitalist social relations and consequent habituated human practices in which we are all involved These together with the historically specific form of capitalist wealth are the real enemy the essence of capitalism that must be abolished in order for humanity to have any hope of social and economic justice in the future *The Journal of Political Economy* ,1927 Deals with research and scholarship in economic theory Presents analytical interpretive and empirical studies in the areas of monetary theory fiscal policy labor economics planning and development micro and macroeconomic theory international trade and finance and industrial organization Also covers interdisciplinary fields such as history of economic thought and social economics **Cumulative Subject Index to the Public Affairs Information**
